Thread: [\[Tutorial\]Hacking windows XP/7/8/8.1/10 using Metasploit Tutorial\[Noob friendly\]](#)

spirited_wolf™ - August 25, 2016, 10:17 pm

So, Hello HackForum members ?

I am Spirited wolf and today we are gonna talk about how we can hack windows xp/7/8/8.1/10 using metasploit+shikata_ga_nai encoder.

I Hope it will really help you in exploiting?

[Video: https://www.youtube.com/watch?v=lgbJcu1Tj_0]

Note:PS:In tutorial i have exploited the vulnerable machine in my own network but if you need to exploit outside your network then you need to Portforward first and bro making undetectable payload you can buy/make FUD.

This tutorial is for educational purpose only i'll not responsible for any harm.

Thanks for watching guys and keep watching penetrating testing with spirit

I have a question: Is it possible to use Windows to run Metasploit and do this? If not would a Linux virtual machine do the trick?

Noshy - September 11, 2016, 3:17 pm

Yes metasploit can also be used if you are running windows.

Yes kali linux for virtual machine also does the trick

Hoodie+ - September 11, 2016, 3:18 pm

The time has come, Hackforums has discovered Metasploit.

I am so proud. ?

Good job on the tutorial!
