FAQs

Spoiler [\(Click to View\)](#)

Q: Does the keylogger support Unicode and Global keys?

A: Yes, it does.

Q: Does the keylogger capture game keystrokes along with login details to different online services?

A: Yes, it does.

Q: Is the keylogger FUD?

A: Your files will only be obfuscated to stay secure but maybe not be FUD.

If you want to crypt your files to make them FUD, then you need to buy a crypter.

Q: How will I receive my logs?

A: There are currently two ways of receiving logs. You can have them delivered via SMTP (Mail) or FTP (File Transfer Protocol).

Q: Is it possible to ask you for support?

A: Yes it is. That's included when you purchase our product.

Q: What should I do if I find a bug in the application?

A: If you find a bug, please contact us as soon as possible so it can be fixed.

What Keylogger that is on the market currently has that feature? Autolog doesn't. TTiger doesn't. I know iSpy Logger used to have it, and as I said is it will be implemented in the future but SMTP and FTP Delivery methods are available and those are as effective as a panel.

Yes i want to buy this software.

GactX - September 22, 2016, 12:24 am

i purchase today but i not receive link download

?etro - September 22, 2016, 12:22 pm

Everyone, the link and NETSeal code comes to you via email.
Check your emails.

I am online now and will be online daily. Sorry for away time.

Well,
due to chargebacks PayPal is now handled over PM.
PM me to purchase via PayPal.

?etro - September 29, 2016, 11:47 am

Project is available.
This is still maintained and working, feel free to purchase with BTC via autobuy.
For PayPal, PM me.
