So I'm doing my thing on Skype exchanging some cash for my home boys, and this random kid adds me on Skype and says " hey br0 can I get some of that BTC haHAA" and then promptly goes offline.

About a minute or two later I noticed my ping went up from 18 to like 250. I didn't DC though so obviously this kid was using Jays Booter.

Joke was on the kid though because he doesn't know that I LOVE packets!

Man I hope not! I can't imagine what would happen to my mental sanity if I didn't have the Internet for an entire week!
