Thread: [GeoMask | FREE 1 Year Trial | PPTP | TCP/UDP TunnelsThread Move](#)

Dead Eye - August 26, 2016, 9:56 pm

[GeoMask](#)

Looking for a simple VPN service but don't know where to look? Well, GeoMask might provide just that. As a matter of fact, to show our appreciation, we are giving users a FREE 1 year trial! Only for a limited time, so get it while it lasts!

Apart from the actual VPN service, we also offer another great service, which we think you will find very useful. UDP and TCP tunnels.

A great example would be connecting to a Teamspeak server. If you would rather not have all of your traffic going through a VPN just to connect to a Teamspeak, you can use the UDP tunnel to do just that. First, get the IP and port of the service (in this case, a Teamspeak server) that you want to connect to, enter the IP address that you will be connecting from, and connect with the IP and port that we give you. It couldn't be more simple.

And of course, if you want to do the same with a TCP service (an easy example would be a Minecraft server), you can go through the exact same process on our TCP tunnel page.

Spoiler ([Click to View](#))

Sound interesting? Want to give it a shot? Well then get started! Our free trial won't last forever! Sign up now at <https://geomask.net>

I think the free UDP & TCP tunnels for traffic are very clever and can be useful.

Dead Eye - September 4, 2016, 5:15 pm

Still offering this service to anyone who is interested!

e_coil - September 6, 2016, 9:42 am

Thank you for this! Going to try it now! :)

No problem!

Still up and running. Get it while it lasts!

Let me know if you ever consider adding an australian server to this!! :

Fillerino - September 6, 2016, 11:19 pm

A EU/NL server would be Nice to tunnel udp/tcp thorough.
