Thread: [Dratini nests?](#)

AleXX3k - August 27, 2016, 3:23 am

Has anyone come across any Dratini nests, since yesterday (26.8.) when nests got updated/changed?

I have 5 100%IV Dragonairs i really want to evolve, so if anyone found any dratini nests let me know please. ?

Not sure on any Dratini nests but I wouldn't recommend botting on your main account if this is what you plan on doing.

If it is an account you're not bothered about leave it botting in a city next to water and you should be able to pick some up.

It's a 100% botted account, been botting it for like a week, but i keep catching way too many 100%IV dratinis, so i'd need a ton of candy.

I have 2 perfect dragonites and 5 perfect dragonairs, so to evolve and power all of these up, I'd probably need around 1k candy.

Be prepared to lose this account soon, I wouldn't recommend posting up your Dragonites in gyms.

I won't be competing for gyms at all, that's how i lost my "main" account last ban wave. What makes you think I'll lose the account soon?

The bit that it's 100% botted with all those potential Dragonites, with your current Dragonites. Was this account botted near your home, or with a preferred coordinate miles away?

It was botted in different cities in the US, considering traveling time and stuff.
I'll let you know when/if i get banned.

Thank you, in case i find one, I'll post it aswell.

I have 7 perfect dragonairs by now, this is getting very frustrating...

Are you sniping to obtain your dragonairs/dratinis? If not sniping could be a viable option but its risky so don't over do it.

AleXX3k - August 27, 2016, 12:53 pm

I'm sniping for them, but i keep getting more and more of the perfect ones, and it seems, like I wont be able to evolve them ever. At this point i have 3 dragonites and 9 dragonairs

To be fair though you only need 10 perfect Dragonites really as you can only control 10 gyms at once. Dragonites imo aren't even that good anyway its just that they're rare that everyone raves about them...

Vouch for this post, I feel like Dragonites are ban bait, and if you know how to pick types properly, they're not a bug deal.

Well, I'll still be saving them, incase the account isn't banned when trading comes out, they might sell for a lot to the locals.
