Thread: [Recommended PokemonGO Bot?](#)

Exchanged - August 27, 2016, 11:39 am

Which bots do you guys recommend For PokemonGO?

ScorpionOfWar - August 27, 2016, 1:15 pm

I like GoManager, PokeMobBot and I heard that YOBO is a great Bot too. If you have questions feel free to ask

OMG I received The pokeball award with this post :O

Ratt - August 27, 2016, 1:18 pm

Personally I like to use Pokefarmer, has always been a great bot in my opinion.
Sadly, it is not free but it is very cheap. If you have any questions about it PM me.

I still dont get it why people pay money for PokemonGO Bots because they are just edited versions from other bots or built on the same api like all other bots just with maybe a better design.

Whenever other bots aren't working Pokefarmer stayed up for the most part. Throughout my times of having the subscription it didn't go down at all and gave a few high quality updates.

MrARM - August 27, 2016, 3:10 pm

Nemesis is pretty good IMO, based on pokemobot

The ?udge - August 27, 2016, 3:30 pm

Pokemob Bot is the bot I'd recommend to you. It's really simple and easy to configure. Also a lot of configurations can be made so it's overall good.

Yin Yang - August 27, 2016, 6:52 pm

Just be careful with sniping and going to too many pokestops. That's how most people got banned. There are some configs out there that are really good. I would try this one:

I second this, sniping is probably the riskiest thing to do right now so I'd be careful with it.

Gamer Fusion - August 27, 2016, 7:09 pm

PokeMobBot is pretty good, they're trying to make it so everything is more legit.

xuNsh1ne - August 27, 2016, 7:40 pm

Wait for the new Pokemobbot

SIM-403479 - August 28, 2016, 6:22 am

Pokemobot is the best one out there at the minute in my opinion. If you check out Herbert The Pervert's thread he has posted a really good setup that works. I have been using it for the past week and haven't been banned yet on 4 different accounts.

No Skill Master - August 28, 2016, 6:32 am

i use hackemon atm. very nice and clean bot , no bans 1 week 5 hours a day. and has a snipe option

TheBlackDude - August 28, 2016, 6:56 am

Yeah, i would recommend Pokemobot.

Construction - August 28, 2016, 7:28 am

If you want a good GUI I would go for POGO Best Bot cracked and if you want to bot multiple acc go with GoManager

The ?udge - August 28, 2016, 7:48 am

I'm not sure about cracked pokemon go bots since you don't know what else has been added to them.. So you either bot on a RDP with cracked bots or use "safe" ones on your own PC to be sure.

Ice Poseidon - August 28, 2016, 7:52 am

I'm using TuringBot so far so good :)

ScorpionOfWar - August 28, 2016, 8:23 am

(Aug 28, 2016 07:52 AM)Nikky. Wrote: [\[CITE\]](#) I'm using TuringBot so far so good :)
Isn't that a modded version of Necrobot? I don't like Necrobot

Deno - August 28, 2016, 11:14 am

Catchem ! it supports proxy+multiple accounts which you can start by just clicking one button

Check this [THREAD](#)

jdamn - August 28, 2016, 12:28 pm

Redox bot works great for me. I bot level 25 accounts in 24 hours

U?para?ormal - August 28, 2016, 3:38 pm

I agree with "Imadrightnow"

Cathem is a really great bot, I've run it for 48 hours no bans.

Theodore Evelyn Mosby - August 29, 2016, 8:34 am

Any bot you use, no matter how humanized, will get banned eventually. This because even if your settings are perfect niantic will always know bot requests because they are not organized similarly to the official app. For this the TuringBot dev stopped the proj until rocketAPI gets it sh*t straight.

Nighterance - August 30, 2016, 12:49 am

I used to use Haxton, got banned lvl36. I recommend for now not to bot, until PokeMobBot releases their new update, where will be 95% safe.

Good luck :)

SL x TnT - August 30, 2016, 1:06 am

He'll have to do what every other dev is doing and make their own library. At the moment, it doesn't appear like they're using the request information to hand out bans. If they were, everyone using RocketAPI would be banned every major banwave. It appears to even use legacy requests that aren't sent anymore.

I'm going to have to go with that they're banning by leveling up too fast right now.

There's no "best" bot. Each has their own unique features.
What do you want for a bot?

Mass botting? Go with one that can handle multiple accounts at once that doesn't rely on other bots.

"Human" movements? Turing / PokeMobBot.

Faster fixes after API updates? PokeFarmer.

I'd personally try staying away from Necro forks.

SIM-403479 - August 30, 2016, 6:12 am

Good luck :)

Where did you get that percentage from? No bot is ever going to be safe. Some safer than others though.

I have botted four accounts on the Pokemobot as it is now and I haven't been banned yet.

Al-Dunia - September 21, 2016, 3:10 pm

MyGoBuddy is a new Pokemon assistant that are offering free V.I.P to the first 500 users before the full release, worth a shot in my opinion!

Sparkfear - September 22, 2016, 9:42 am

I'm using PokeGo Bot by Mark Gore (botwith.me). I've botted just using that bot and I'm lvl 31 right now.

The bot is very stable and easy to configure.

marianolaciar - September 27, 2016, 1:43 pm

i love pokebudy work fine :D

International - October 1, 2016, 10:24 am

Pokebot ninja works like a charm. Java based.

danaox12 - October 2, 2016, 8:57 am

okemob Bot is the bot I'd recommend to you. It's really simple and easy to configure. Also a lot of configurations can be made so it's overall good.

Buzzle - October 3, 2016, 3:23 am

I don't think botting right now is a good idea due to how the ban wave works.

roboo176 - October 3, 2016, 7:49 am

Niantic forced the 0.39 Update and any bots running on the 0.35 API Client will be 100% flagged for sure, so it is advised to stop botting until someone potentially cracks the 0.39 API...

Drikhs - October 3, 2016, 8:19 am

I'm still botting with Pokemob bot, with an other acc till the Ban wave is over, :)

Sparkfear - October 3, 2016, 11:16 am

PokeGo bot by Mark Gore is still running flawlessly through the ban wave, I haven't seen anyone getting banned on the forums so far.
