Hi guys!

Why we cant buy l33t or ub3r in PP? I only got PP so how i can buy it :D

Don't buy it, it's a waste imo. And you are only able to buy it with BTC or other Crypto currencies at the moment.

Ask an exchanger in the [Currency Exchange](#) section or make a thread in the [Buyers Bay](#).

You could also use [WeSellCrypto](#) after you've verified your e-mail.

i didn't pay with btc or paypal when i bought leet. but that's a year ago or something.

You need to exchange it for Bitcoin.

I suggest posting a thread in traders topics saying you want upgrade for leet. They'll charge you an extra percent because of the hassle and worth.

It used to be possible, that's how I purchased it. Just exchange PP to BTC, I don't think Omni will make an exception for you.

You exchange your pp to btc then continue with the purchase go checkout the currency exchange section. Shouldn't be too hard to get it swapped if your pp is verified.

Yep, some currency exchangers will do it for less than \$22.

A lot of people on here who'd convert paypal to BTC for you.

The issue is people would attempt to scam using PP and basically get free upgrades. Omni put his foot down and made it BTC and other Crypto's I believe.
