Thread: [Low budget HQ gaming setup .](#)

Lufasu - August 28, 2016, 6:43 am

Well , i got this today (hour ago) i ordered keyboard for me and headsets to my little brother.

Got it after two weeks , its cheap and so high quality.. so i had to share it with you .. expect buying all this razer shit that cost you 150\$++ for stupid mechanical and rgb options and some company logo.

SO -

http://www.gearbest.com/keyboards/pp_298472.html?wid=21

(go for the silver one / red one, the red rose looks like a CUM)

Amazing keyboard , mechanical keyboard + rgb (chroma like) .

Has fps / moba / mmo led mods

amazing mechanical keyboard , offers you RGB and cool style + a program (in chinese) to control your leds , the buttons based on RED cherry X as i know , its for gaming .

For now i just happy with this keybaord , im happy that i didn't order any razer or corsair .

Video showing the keyboard to show you that isn't a shit thing -

[Video: <https://www.youtube.com/watch?v=psmlfkIOJq0>]

Go to 3:41 to skip this noob guy talking.

So , i just vouching for this keyboard .. saved me some money and doing a GREAT job.

Headsets -

http://www.gearbest.com/headsets/pp_126115.html?wid=21

(The price is cheap i know , but..... the quality .. ohh the quality so OP)

Ordered this one for my brother , i test them by myself .

i have to say , this is the most high quality headsets for the most cheap price that i ever see.. The bass is good (reminding me high quality fake beats bass)

microphone - Simple microphone people gonna hear you without any background / static sounds ..

You also an mute / unmute key on the headsets , also volume controlling on the cable himself.

Video showing the headsets -

https://www.youtube.com/watch?v=e_yL1WHLttQ (not allowed 2 videos)

Skip to 2:21 to see action.

Mouse -

http://www.gearbest.com/mouse/pp_367928.html?wid=21

My experience with this mouse (was have it before for 2months).

This mouse is great , simple mouse that what can i tell you everything you need .

The style reminds me some razer style , led lights mouse And have upto 1000-4000DPI , 6DPI adjustments and USB plug :).

MousePad -

aliexpress.com/item/900-300mm-Extra-Large-Desktop-Anti-Slip-Mat-Rubber-Mouse-Pad-for-PC-Computer-Wireless-USB/32642830146.html

I choosed that beacuse its for the keyboard + mouse together .
Its cool and beauty for your setup , its very comfortable and smooth .
Great mousepad to use .

Well , thats it guys.. Im not fan of any "famous" companies like razer / corsair / coolermaster or anymore.. i care about quality and price.
I dont care about my items companies , atleast i save money and build a great setup :P

Hope i helped you !
also , sorry if my grammar gives you ebola , im working on it .

Another thing - If you dont care about mechanical or your budget is low than -

http://www.gearbest.com/mice-keyboards/pp_197269.html?wid=21

Simple keyboard , with leds lights .

Colors on the leds (i have this keyboard at home so i plug in to tell you) - LED COLORS CANNOT BE CHANGED

Left side - Blue

Middle - Some orange / red mix

Right side - Green with blue mix

arrows - Blue

Space - RED

Numpad - green mix with blue and strong blue.

Well , its an simple keyboard , if you are going for really low budget setup , this is the keyboard for you .. have anything you need leds , usb plug , smooth and comfortable buttons . This is not a mechanical keyboard so if you dont care about mechanic , i gonna tell you that is the best you can find.

Mr.Peanut - August 28, 2016, 6:46 am

This was a really really good post man. This could be used in mind for people with lower budgets!
Thanks man :)

Ratt - August 28, 2016, 6:46 am

I just have a mechanical that lights up blue and it works fine with a Razer Naga mouse.

Lufasu - August 28, 2016, 6:49 am

i really happy that you like it , i opened it beacuse my friends have the razer keyboards / headset / corsair and more famous companies .. so i tried this ones up , and i dont see any change.. same quality , so for me its just adding a famous company logo and raise the price.

(Aug 28, 2016 06:46 AM)Accent Wrote: [\[CITE\]](#) I just have a mechanical that lights up blue and it works fine with a Razer Naga mouse.

yea i have the CK104 that i posted its work so great with a cool led mods and the mechanical keys :)

Gamer Fusion - August 28, 2016, 6:52 am

Thanks for this, might check out them videos.

Tommy Chong- - August 28, 2016, 6:58 am

This seems like a quite good low-budget keyboard.

I got the razor blackwidow ult so i don't really need it.

But i'd maybe buy it if i got some spare money to spend. Just to have it, or take it with me if i take my laptop to somewhere.

Maradonnie - August 28, 2016, 7:03 am

I'm saving this for when I have some cash left. Thanks bro.

Lufasu - August 28, 2016, 7:10 am

Check the thread , i edit.

Added another keyboard for 15\$, same thing as the first one just without mechanical and not the same style and without leds control.

:)

CookieBear - August 28, 2016, 9:05 am

one question. do you think that a mouspad is inportant or helpfull for playing games? cause iam thinking about to buy one :D Ty for helping and thanks for this post!

okay :D

one other question. Iam from Germany and in the review a saw the bad quality of the packaging. That scares me a little. Cause the site says that they will shipped to me. Can you tell me to 100% that it will come completly safe to me?

PS: sorry for my bad english :D

Cookie

lol its fine , look at my english too.

Well , i guess they will bring you a working and high quality item.
they dont screw up those are big companies that care about their name.

Demonstrate - August 28, 2016, 9:53 am

You can also build a desk for relatively cheap with parts from Ikea.

CookieBear - August 28, 2016, 10:27 am

thank you bro :)

last think. What is that for a website? All on this page is so cheap. Is that all legit and no fake.
Cause I see alot of Asian thinks there.

Added another keyboard for 15\$, same thing as the first one just without mechanical and not the same style and without leds control.

:)

It looks alright, but I personally really dig the feel of a mechanical keyboard.

So IF i'd buy one of these, i'd go for the mechanical one.

Looks way too sexy for such a cheap keyboard ?

Lufasu - August 28, 2016, 10:40 am
