Thread: [NO VERIFICATION | Account Creation Tutorial](#)

ohxerxe - August 28, 2016, 5:49 pm

This is going to be a quick tutorial on how to make many accounts on youtube and not have to verify them.

1. Create or Select a Google account you have access to.
2. Head over to youtube and create a channel if you have not already. You will need to verify this first one.
3. Head over to google maps and search for any random non claimed business. Click claim business and allow it to setup your business account.
4. Head back over to youtube and click on the profile icon in the top right. At the bottom of the popup it should say "View All for email@gmail.com Click on that.
5. You should now be at a page that looks like this.

The very bottom is what you want to select it should be called the name of the business that you selected.

There you have it. No Verification needed what so ever. I have thoroughly tested this but it has yet to fail me. With the number of accounts you can do with verification and then add more on this way you could get yourself alot of accounts for Liking, Subscribing, Disliking, ETC.

Sorry if this looks like it took me ten minutes.(It's because it did?)

This is awesome. Can you claim as many as you want with 1 account and just add a bunch of channels this way?

Not to sure about the number havent tested it really but You can get a decent amount of verified accounts to add these types onto. I have done over 5 at once though. so lets say you can do 10 accounts with your phone number. Then freely add these to it no verification. That is 50 accounts

This is good for anyone that can create a bot for selling liking services or disliking services.

This is a great way to get mass banned and ip blocked, and you will need number verification if you try to create a good ammount.

This pulls up red flags for youtube.

It sure would be great if it was this easy.

This method used to be a thing back 4 years ago maybe.
