Thread: [\[LIST\] 3 Cool , Old , fun games to play \(MMO\).](#)

Lufasu - August 28, 2016, 6:06 pm

Hey , on this thread i gonna show you a good MMO games that im still playing and i never saw people talking about them here.. so time to get you some good MMO games with some good pvp / pve systems.

I play all of this games so i know what im saying

Lets start with -

Blade and Soul -

Official website for EU / US versions - <http://www.bladeandsoul.com/en/>

So , Blade And Soul , "old" game but kind of new on the english version .

The game based on korean / chinese / taiwan anime as i know , the game first relased on the korean versions that after a 2-3years to the english version.

The game is good , easy to level up (not that easy) , leveling up basing on quest mode , the quests are sometimes hard and sometimes easy .

There is alot of fun classes , and great PVP and PVE systems that worth playing , trying.

I play this game often , played alot of months , have 10 characters on diffrents servers and also have my own guild , the game is fun..

Just try it , watch some videos of it and if you like it , you gonna be addicted :) , its also a good game to make money by farming your gold.

On your max level , each quest gonna get you like 3-5 gold per quest, and there is alot of quests to do , you can get to 2000gold if you do it from multiple characters .

Gear Upgrade -

Well , at level 3 you will get an weapon that will be with you until level 50+ .

To upgrade your weapon you will need a another weapons above your leve weapons and you gonna use them to upgrade you weapon stages.

Sounds easy but... after you reach the maximum upgrade , to keep upgrade you gonna need a stones , gold and some more expensive items to upgrade it , so its not easy :).

Classes -

Destroyer - Great class for PVP , less for PVE , class that you need to practice alot to be the best on pvp and the class with alot stuns .

Blade Master - STRONG class , you need atleast month pc training on PVP to be good , you can one shoot people if you know the combo and the timing.

Blade Dancer - Simple class , easy to learn , easy to play and can one shoot your enemy fast .

Kung Fu Master - very strong class , based on one combo on PVP (3RF) , that can get up to 70-80% of the enemy HP if you're doing it right .

Force Master - Worthless class on PVP , good at PVE , based on ice/fire magician (range attack).

Assasin - One of the BEST classes in the game , you can be perma invisible if you know how to play this class , you are good.

Summoner - class that will make you break your table when you fight against it , this class have a pet that attacking you on PVP + you can attack with the pet so its like 2v1 on PVP , very hard to win .

Warlock - uhmm , not too strong , but since i one shoot someone with my warlock i gonna say its a good class , took me 2months to train and get the combo timing as perfect.

Soul Fighter - Mixed class , Force master and kung fu master , since i dont have a character with this class , i gonna show a video of it.

Pay2win rate -

Well , since the game isn't really pay2win , but you can buy gold from companies so it is pay2win . But you can farm your gold fast so its makes the game 50/50 .

At the start , the game was perfect , no any gold sellers no any companies ..

but then they started to build an actual bot for that game so they start earn gold and sell it , alot of people saw that coming .

If you're planning to get to this game for buisness , here is the gold prices -

US Region - 1gold = 0.25\$ - 0.15\$

EU Region - 1gold = 0.15\$ - 0.10\$

PVP System -

One of the best , balanced , fair and fun pvp system that i ever played.

There is no OVERPOWER class (maybe summoner KAPPA) .

This pvp system its balanced beacuse if your enemy have 200 attack power , and you got 1attack power , they system will calculate your damage and your both damage will be same / high beacuse of the skills, but most of the time its same and sometimes high based on your skills and level.

You can start to PVP at level 15 (not recommended).

There is an open world PVP too , that your damage based on your gear , so newbies stay away XD.

PVP Videos -

Blade dancer - (open world PVP)

<https://www.youtube.com/watch?v=6Mi2yN9zLPc>

Kung Fu Master PVP - <https://www.youtube.com/watch?v=t4ldNSjzaIA>

Blade Master PVP - <https://www.youtube.com/watch?v=40LTLZOayxl>

Destroyer PVP - <https://www.youtube.com/watch?v=2eZt9nJmleg>

Assasin PVP - <https://www.youtube.com/watch?v=NJb8NbrBeRM>

Summoner PVP - <https://www.youtube.com/watch?v=Lj2D0JAYk7Q>

Force Master PVP - <https://www.youtube.com/watch?v=mkLaNDaTG00>

Soul Fighter PVP - <https://www.youtube.com/watch?v=8qNx6NJyy5w>

Some helpful guides -

Kung Fu Master (3rf combo guide) - https://www.youtube.com/watch?v=McB70_QFJwM

Assasin combo guide - <https://www.youtube.com/watch?v=EWIBSxrLso>

Destroyer combo - <https://www.youtube.com/watch?v=SHDQhhKy088>

Some cool videos -

Soul Fighter PVE Guide - <https://www.youtube.com/watch?v=GtZCaIO1SjY>

Summoner PVE - <https://www.youtube.com/watch?v=0es9C-RNbiU>

Thats it for blade and soul :).

----- Silkroad Online - PRIVATE SERVERS ONLY

Why private servers ? - The official game started to be too much pay2win based... without 2000\$ starting money you cannot be strong enough on guild wars / pvp , also the official game has delays while playing and bad community people , so i dont recommend to play on the official game.

To find the best private server - <http://www.xtremetop100.com/silkroad-online>

So , silkroad online... OLD game that based on arabian / chinese places...

like - constantinople , baghdad , Jangan (some chinese town) , alexandria , arabian coast , deserts and more.

This game one of the best i ever play , i started to play on 2008 and after alot of quits im still getting back to this game over and over again .

On this game there isn't much to do , expect leveling and PVP (the pvp is fun) .. There is 2 races on this game with 2 diffrence classes .

Europen / Chinese .

Some diffrences -

Europen -

- 1.Have 20 sec's cooldown when using a regular potion
- 2.Can take 2 builds (like Warrior + rouge , Warrior + cleric and more)
- 3.5sec's cooldown on mixed potion (25% HP / 25% MP regen)
- 4.Have the most strong classes
- 5.Very hard to play (you need to learn 2 classes combos to survive).
- 6.Expensive race

Chinese -

- 1.No cooldown on regular pots
- 2.5sec's cooldown on mixed potion (25%/15%HP/MP regen)
- 3.Not good at PVE
- 4.Can take only 1 class with addontial magic power.
(Ice / Lighthing / Fire.)
- 5.Good at PVP.
- 6.Easy to play
- 7.Cheap race.

Pay2Win Rate -

Well , as i told you , the Pay2Win rate its like 600% ... you buy your gear , you buy your ingame points , you buy your ingame currency and you buy BOTS to level up (beacuse this game isn't quest based).

So , please .. play on private servers , there is alot of private servers with like 4000 - 6000 people online , oldschool servers / Nowdays servers .

Gear Upgrade -

On any private server there is an another successing rate, also in any private server there is another max plus that you can upgrade your weapon.

But since you gonna play on HQ active server , the max plus gonna be atleast 10-12 , Its not easy to Plus , like from 1 to 5 its can be hard , and can be easy pref on the rates , but the most expert ones starting from +8+++ in any server that based on old school.

In Silkroad online there is 3 types of rare weapons -

Seal Of Star - Tier 3 , easy to get not too rare.

Seal Of Moon - Same more than easy to get , not too rare.

Seal Of Sun - HARD to get , NOT easy to get , and like 0.05% of drop rate on the official game.

Classes -

Weapons (EUROPAN) -

Bowman - Using Daggers + bow (on pvp you gonna use both of them).

Warrior - Axe , One Handed sword , Two Handed Sword , Shield (you gonna use them all to get your combo great).

Cleric - Simple cleric rod

Wizard - Staff

Warlock - Dark Staff

Bard - Bard.

Classes reviews (from my experience) - EUROPAN

Bowman - Bowman its an hard class beacuse you need to use 2 weapons and you need to have BEST timing , for this you need to practice alot, but daggers its one of the strongest class in the game.

Warrior - Strong class , alot of stuns , great buffer for PVE parties and great for PVP (alot of damage , stuns).

Bard - Class for PVE , raising your magic attack , defense , speed and more , mostly buffer class.

Cleric - Simple.. healing , reviving.

Warlock - Cursing you , stealing your hp , can debuff you with 10+ debuffs.

Wizard - The most strong magic attack power class in the game .

Chinese classes reviews -

Glaive - the most strongest class on the chinese scene , easy to learn and play, good for PVE and solo PVE.

Blader - really bad for PVE , and good for PVP , can survive alot and making damage and also blocking beacuse his shield.

Archer - OK class , good for PVE , solo PVE .. Good also on PVP , you just need a good gear .

(when you pick a chinese class , you will get an option to have more addontial power ICE / FIRE / Lighthing / Force.

Lighthing - Good for INT (magic) characters.

Fire - Good for INT , but use it with your phy attack character.

Ice - worthless , use it when you are phy attack .

Force - Can revive , heal.

How can chinese can be INT (magic)?

Its called 'NUKER' , here is a small guide about nuker -

What is nuker -

I think the best way to describe a nuker is a magical based character that uses magical attacks called nukes. This guide will not cover the many hybrid variations, but only the pure int build variations that remain after the 90cap update.

Why should i open a nuker -

Well it's the Chinese build that does the most dmg, levels the fastest and is the most diverse of all the build. You'll get to use the most skills and the only thing that stands across it is that you have

less hp.. but we'll have some skills against that. And another downside is that you'll need a lot of sp.. so you'll have to do some farming. Also this is not covered in this guide. Just look at one of the many other guides about that subject. (which will be put up by me if they turned out missing)

Building a NUKER -

Remember this is a pure int guide! So first of put ALL your points in INT don't get str not even 1.. "but I want more hp.. but what if...." NO! don't do it!! If you want a hybrid or more hp go read a hybrid int guide.. this is for pure cause imo pures rule and own.... and hybrids well let's just say that's a different story. So STR bad, INT good.. remember that

Types of nukers -

Ok first of ofcourse, you have the spear nuker which deals the most dmg and then second you have the s/s nuker which deals a bit less dmg but on the other hand your shield gives you a lot of extra defense.

I'm gonna describe the ideal builds for both of them.

S/S = Sword + shield (like blader).

Rouge / Warrior PVP video that you will know about what im talking when i say "you can pick 2 builds" -

[Video: <https://www.youtube.com/watch?v=18XLkUGPcEU>]

Chinese PVP -

Glaiver PVP - <https://www.youtube.com/watch?v=she8Hu8zlgU>

Blader PVP - <https://www.youtube.com/watch?v=Lpn6Plwvn2A>

Archer PVP - <https://www.youtube.com/watch?v=nUs08UTBZiw>

European pvp -

Rouge + cleric - <https://www.youtube.com/watch?v=wEJJ5E2wLrQ>

Warrior + cleric pvp - https://www.youtube.com/watch?v=r_CrxHoi9xM

Rouge + Warlock pvp - <https://www.youtube.com/watch?v=VV9KaSsM83s>

Thats it for Silkroad online - Best game to play , great PVP , great PVE!

Tera ONLINE -

Tera... OLD BUT GOLD ! #brusk :>

Tera is the second MMORPG game that i ever played, i started as a warrior , now im a gunner , the game was on FULL activity when i was playing.. but now .. its all gone , game started to be half pay2win , but you can get your gear alone , the pvp is still good but not like the old days , i play this game alot , to enjoy the PVE beacuse its fun asfuck , and also to make some money by farming gold :)

To Download tera you need to have STEAM , you can download tera by using your steam so its more nice :).

Soooo TERA races -

Human - Create a light armor faster at 10 % .

Restores HP in a row after that animate you . That you have less than 30 % of life you get less damage in PVP .

Option in PVP or paralyze you 'll drop dramatically decreases to 3 minutes .

Castanic -

The CRAFT of metallic weapons increased by 10 % . Critical hit rate increased by 1 % 're attacking from behind .

Damage in a fall from heights of 50 %

Aman - Your life is below 50 %, you get 10 % less damage .

DOT charms resistance increases by 10 . Ore quarrying speed faster .

Popori -

Monsters battle but not start your walking speed decreases by 40 % per minute , and the effect decreases if you use magic or begin a battle . Speed walking out to battle rising by 20 to 3 minutes .

Gathering plants faster . Swimming speed faster than others

Elin -

Monsters battle but not start your walking speed decreases by 40 % per minute , and the effect decreases if you use magic or begin a battle . Speed walking out to battle rising by 20 to 3 minutes .

Gathering plants faster . Swimming speed faster than others .

Baraka -

Your e STAMINA not fall below 20 % . Magic resistance causes a shift in 10 .

Speed instinctive magic weapons increased by 10 % .

High Elf - Speed of the essence Assembly increased .

Restores MP in a row after that animate you .

* Brings you 100 % of the MP , every two hours you can run it with I'm not mistaken .

Classes guides (From my experience)

Some classes may be missed but i'm making a guide about the class that i really play expect telling you bullshit

So what can we learn from this picture?

Hit Points (HP) - basically how many lives you have , the Warrior leads here necklace with 903 HP began , while Frist least with 527 .

Mana Points (MP) - with some mana you begin , Priest leads with 250 MANA started , and Archer with a least 50 .

Damage - How much damage do you do with all the skill , this stat is important because it determines the bottom line is how much the maximum damage you do , as you see

The Archer leads with 81 points of his skills so I actually have the potential to most damage , Priest and Mystic least a 32 , so they Will do the least damage ..

Defense - how much protection you have , that some of them actually resist the damage that you receive from monsters and other players , Lancer leads with 29 and even

The main reason for it is in the tank , the least Sorcerer 12 so he actually gets the most damage from monsters and other players .

Movement speed - what speed of the player , it is very important , for example middle of a battle so you can escape by beating faster and easier , the fastest

It's the Warrior 120 , most of this slow the Lancer and Berserker 105 .

Critical Hit - basically what your chance to crit with skill (which is actually hit 2x damage) , so that's

higher than you would be so critical blows ,

Highest Berzerker and Slayer with 75 , the most low- Priest and Mystic with 20 each .

Range - What 's the maximum distance attack your skills , for example Sorcerer and Archer have attacks that can reach up to 15 meters of them ,

Warrior for example can reach as far as the skill to 2 meters away .

Attack Speed - basically what the delay between Mecca Mecca , as it is lower so you actually can attack more quickly , the warrior leader here with 0.4 seconds ,

Most of these slow and the Sorcerer 's and Berzerker with 0.7 .

Attack Type - here comes the basic blow and how it affects all foreign classical and what Warrior Slayer hurt just ahead , while they also damage around them .

According to stats like that actually more than you can tell pretty much how will each Class , so why fix it briefly :

Protection : HP + Defense

Attack : Critical Hit Damage +

PvE :

PvP :

Warrior-

Defence : very high , plus it has defensive skills such as block and jump sideways (Evade) so that you avoid the blows against you .

Attack : Medium , skills do not hurt much stronger and there is no critical , but very, very quick attack .

PvE : I can play as a DPS or Tank , has a very strong Debuff against Bams .

PvP : Very good , a lot of skill to control and can dodge enemies .

Sorcerer-

Defence : very low , but it has some skills that he can avoid damaging only need good timing to use them .

Attack : high , high damage but low critical , yet the fact that he enjoyed very remote attacker so he can focus on skills .

PVE : DPS is excellent and sought after throughout the Party , solo PvE must be careful not to get hurt too many monsters .

PvP : excellent , lots of skill robust control , and remote attacker can easily kill enemies unprepared.

Slayer-

Protection : medium , one skill he has run away from enemies , helped a lot in his Stuns also prevent damage .

Forwards: very high , high damage and Crete very high speed clouts and highly offensive .

PVE : DPS also excellent , also considered relatively easy because most of his skills connected together combo .

PvP : Medium or higher , is not it hits hard and has some good skills against other players , but it is very vulnerable to attack by others .

Priest + Mystic-

Protection : low , low HP and armor , but we must not overlook the fact that they are healers and can even heal themselves and that really helps them stay alive .

Attack : low , do not expect them to be DPS .

PvE : healers every sense of the word , that's what 'll be expected of you as well .

PvP : ditto

Lancer-

Defence : very high , high HP and armor , a lot of skill protection and resistance to damage .

Attack : medium , can do quite a bit of damage .

PvE : The main tank of the game and what it remains .

PvP : excellent , high defense and some very strong skills to take control of enemies .

Berserker-

Protection : High , Block could have very damaging to defend and later in the game too evasive skill .

Forwards: very high , high , and a lot of damage to critical , very powerful skills with low cooldown .

PvE : considered to many as the best DPS in skilled hands , can land a lot of damage to enemies .

PvP : weak - medium , very slow and relies on the skill of charge to damage , often need help from others to take control of enemies and blows .

Archer-

Protection : medium , they have some skill to evade damage .

Attack : medium - high , while the highest damage to their game , their critical real low and it is very offensive capabilities of their damage .

PvE : Claas very simple to DPS , is considered to many as a very classy and easy .

PvP : Very good , can keep away his enemies lay traps , a lot of skill to control powerful enemies .

Pay2Win Rate -

Tera started to be Pay2Win asfuck , but you can always get your gear by farming .. the only pay2win as i swee that you can buy gold only.. no any OP gears and etc like silkroad online.

But still , its a pay2win , and keep in your mind that playing this game , you gonna need alot of time to spend about farming , leveling and upgrading.

PVP system -

The PVP system on the old days was the best ..

Now its not like the old days , you have new classes , the game being pay2win but its still fun if you have good gear :).

Addontial guide about keys and i gonna end here -

L opens the Quest you your log , where you can see all the information of the adventure you are doing now , locations to them, you should reach map etc. ...

u open you the frind Register / Block

i- opens to you the inventory Slcm- you can watch your belongings

p you open your profile , you can see what you are wearing , static player etc ...

The Skills k your page , showing the skills that your player + skill he could learn

y list of people at your issuing a " post " they are looking for a group of people , usually allowing the group will be listed , please use this button usually starts with the dungeon level 20 first !

Trade- trade between users , replacing things commerce etc

Duel- battle between two players when the battle is over one of the players reaches 1 hp

Invinte to party- invitation to a group , the XP will be divided between your child and you can follow along Quests

Add as Friend- Add to friends

Block- couch ignore list- will not get him an invitation to the party and did not see him chat and supplies to send / receive from Wishpers

Inspect- test a player's clothing + other information

Some Videos -

PVP - <https://www.youtube.com/watch?v=y038oTc1Kz4>

Leveling - https://www.youtube.com/watch?v=_pQCDpmLnok

Slayer combo guide - <https://www.youtube.com/watch?v=gA7Wt56cPIY>

Credits -

Written by me .

Pictures - google / reddit

I hope i helped you guys , took my like 2-3hours to write all that :).

Hope you gonna join to one of this amazing games to play with me / build your own community.

Peace out !

EDIT - WHAT IS PAY2WIN -

A lot of free to play MMO's have cash shops where players can buy xp boosters, high end gear, and other things to make the game easier. Pay to win is referring to these cash shop items because they have a noticeable impact on the game.

Gary - August 28, 2016, 6:17 pm

This was one long ass thread.

Pope - August 28, 2016, 7:44 pm

Holy crap you went into detail. I expected just a list of some sort... not a tips and tricks of each game.

Nice thread

Fortunate - August 28, 2016, 9:24 pm

Nice thread, i actually love MORPG games but i fail to find the right one, maybe this will help.

Lufasu - August 29, 2016, 3:15 am

(Aug 28, 2016 07:44 PM)YTadF Wrote: [\[CITE\]](#) Holy crap you went into detail. I expected just a list of some sort... not a tips and tricks of each game.

Nice thread

to get people play with you / play on the game that you play , you should tell them alot of information before :)

Fidel Castro - August 29, 2016, 7:06 am

Blade and Soul OP, but it started to get boring though..

Tera is dying slowly already :(

You could've add there: Black Desert or Guild Wars 2 :3

Lufasu - August 29, 2016, 7:14 am

I can do guild wars 2 , but its pay2win so hard...

Fidel Castro - August 29, 2016, 7:19 am

It's indeed p2w now, you can go for Black Desert or Final Fantasy XIV Online: A Realm Reborn, they are not pay2win but this are grind-fest games, tho i got bored later on...

I'm more into oldschool games like: Runescape, Lineage 2, Aion.. :)

Lufasu - August 29, 2016, 7:25 am

i dont have much experience with black desert and final fantasy also with all the games you noticed XD

i can do gw2 , dc universe , aura kingdom and more

Fidel Castro - August 29, 2016, 7:31 am

I used to play Aura Kingdom too is fun though, you can go back to it anytime, there are still donz of people playing it, since its a good balanced oldschool-anime'ish-style game :)

Lufasu - August 29, 2016, 7:35 am

yea.. i wanted to go back into heroesgo too.. this game was a legend 3d..

but sadly the developers closes it without reason.
