WINNER PICKED:

<https://hackforums.net/showthread.php?tid=5389844&pid=52387559#pid52387559>

Greetings, been a while since my last giveaway so I'm posting up another one...

Here's how it works!

1. Pick two of your lucky numbers.... eg 30 and 33
2. Join them together and post it (e.g 3033)
3. The winner will be chosen randomly with random # generator

Pick a combined number between 100-1000000, as long as it's over 100!

If you're L33T and you are APPROVED FOR UB3R you will receive the Ub3r upgrade

If you're UB3R you will receive the Gift award

If you're L33T and you are NOT APPROVED for ub3r, you will receive the gift award

Winner selected with RANDOM NUMBER GENERATOR. If there are duplicate entries the first person who posted that number will win.
