Thread: [Top 10 Security/Hacking Tools & Utilities](#)

spirited_wolf™ - August 29, 2016, 4:30 am

Hello HackForum members ?

Here is the list of some most used tool by Security experts/Hackers that you can use.

I think everyone has heard of this one, it's latest version is 7.12.

You can download it from:- [Here](#)

Wireshark is the world's foremost network protocol analyzer. It lets you see what's happening on your network at a microscopic level. It is the de facto (and often de jure) standard across many industries and educational institutions.

You can download it from:- [Here](#)

Metasploit is one of my all time favorite framework. Metasploit Community Edition simplifies network discovery and vulnerability verification for specific exploits, increasing the effectiveness of vulnerability scanners. This helps prioritize remediation and eliminate false positives, providing true security risk intelligence.

You can download it from:- [Here](#)

Here are my tutorials on it::

==>[\[Mega Tutorial Links\]A huge Tutorial collection for hackers/Pentesters](#)<==

John the Ripper is a fast password cracker, currently available for many flavors of Unix, Windows, DOS, BeOS, and OpenVMS. Its primary purpose is to detect weak Unix passwords. Besides several crypt(3) password hash types most commonly found on various Unix systems, supported out of the box are Windows LM hashes, plus lots of other hashes and ciphers in the community-enhanced version.

You can download it from:- [Here](#)

Burp Suite

Burp Suite is an integrated platform for performing security testing of web applications. Its various tools work seamlessly together to support the entire testing process, from initial mapping and

analysis of an application's attack surface, through to finding and exploiting security vulnerabilities.

Burp gives you full control, letting you combine advanced manual techniques with state-of-the-art automation, to make your work faster, more effective.

You can download it from:- [Here](#)

This open source forensics program provides arduous exploration and insight mapping for coating an image of online hazards surrounding you. Maltego does really well in revealing the complexness and intensity of points of failure in your system and the encompassing setting.

Maltego is a superb security program that evaluates the real world connections amongst individuals, businesses, online websites, domains, DNS, internet protocol address, documentation and everything in the middle. Dependent on Java, this unique tool works with a convenient, usable visual interface with many modification selections while scanning.

You can download it from:- [Here](#)

Ettercap is a comprehensive suite for man in the middle attacks. It features sniffing of live connections, content filtering on the fly and many other interesting tricks. It supports active and passive dissection of many protocols and includes many features for network and host analysis.

You can download it from:- [Here](#)

w3af is a Web Application Attack and Audit Framework. The project's goal is to create a framework to help you secure your web applications by finding and exploiting all web application vulnerabilities. It can find more than 200 vulnerabilities.

You can download it from:- [Here](#)

Automatically scan your websites, web applications and web services for vulnerabilities with Netsparker Desktop, a dead accurate & fast web application security scanner. Netsparker Desktop is the only scanner that automatically verifies the identified vulnerabilities, so you do not have to double check them.

You can download it from:- [Here](#)

The OWASP Zed Attack Proxy (ZAP) is one of the world's most popular free security tools and is actively maintained by hundreds of international volunteers*. It can help you automatically find security vulnerabilities in your web applications while you are developing and testing your applications. Its also a great tool for experienced pentesters to use for manual security testing.

You can download it from:- [Here](#)

World's fastest password cracker

World's first and only in-kernel rule engine

Free

Open-Source (MIT License)

Multi-OS (Linux, Windows and OSX)

Multi-Platform (CPU, GPU, DSP, FPGA, etc., everything that comes with an OpenCL runtime)

Multi-Hash (Cracking multiple hashes at the same time)

Multi-Devices (Utilizing multiple devices in same system)

Multi-Device-Types (Utilizing mixed device types in same system)

Supports distributed cracking networks (using overlay)

Supports interactive pause / resume

Supports sessions

Supports restore

Supports reading password candidates from file and stdin

Supports hex-salt and hex-charset

Supports automatic performance tuning

Supports automatic keyspace ordering markov-chains

Built-in benchmarking system

Integrated thermal watchdog

160+ Hash-types implemented with performance in mind

... and much more

You can download it from:- [Here](#)

These are one of the best tools/framework that you can use for pentesting/hacking ?

So, enjoy it my friend ?

LanMan - August 29, 2016, 8:19 am

I would have changed john the ripper by hashcat (Multi OS win/linux/mac, multi platforms: CPUs/GPUs/APU/FPGA dev board, support multiple machine with distributed cracking networks, and its the fastest password cracker out there)

Snaxeko - August 29, 2016, 9:24 am

Thx I'm begginer and glad to see it

Hozz - August 29, 2016, 11:16 am

Nice list.

Thanks a lot!

spirited_wolf™ - August 29, 2016, 4:57 pm

<https://www.concise-courses.com/hacking-tools/top-ten/>

I am fucking sure u copied it wolf because i have seen something VERY similar to this thread. Anyway,Without being said ur tutorials are awesome and i always enjoy them. Please Don't copy paste shitty articles and stick with your videos and pentesting tutorials. Stay HQ and Peace~

sausymayo - August 29, 2016, 8:22 pm

What in the world is Nmap used for? Never heard of it.

Lib - August 29, 2016, 8:29 pm

(Aug 29, 2016 08:22 PM)sausymayo Wrote: [\[CITE\]](#) What in the world is Nmap used for? Never heard of it.

NMAP is a port scanning Tool, It scans for open/vulnurable ports on a system.

EDIT: This was a joke wasn't it?..... -.-

Jallu - August 30, 2016, 2:11 am

Finally an actual helpful list, and not a list of fucking RAT's and Crypters..
Keep it up OP
