**Elitas** - August 29, 2016, 10:19 am

Free International Calls

Hello Hackforums. I've been using these forums for quiet some time now, and have decided to give back to the community by sharing a website where you can make free international calls. Up until now I have shared it with a few friends, some of them have said it doesn't work in certain countries, others have said it may not work whilst on a proxy/vpn as the site seems to block them.

---

I do not own this site, I'm sure a few people know about it but I have spoken to a few people who have seemed VERY grateful for the tip.

---

Link:  
PM me for link!

---

Cheers,

xHackerPr0

The nub hacker with a egoful name!? Requirements: Positive reputation. ?

Secondly, you need +rep for the link.

That is my only request, contribute towards the forum before you get it. Also, I won't be watching this thread 24/7 so PM me if you want the link, don't just commend here.

Regards,

Nubby hackah w/ an ego! ?

Works on chrome/opera only, free international phone calls lasting ~ 5 mins each.

I've found unlimited phone calls with unlimited minutes recently.

You need + reputation.

Also, PM me and post here, don't just post.

Finally, be nice about it, some people saying things like "give me link quick" followed by a message 1 hour later saying stuff like "ugh im still waiting wtf bro" is sort of annoying, thanks, I'll get on and send you it when I am online, spamming my message box won't really do much.

Do you seriously think that searching the app store for an app that gives you free calls makes you some sort of elite hacker?

I'm sure it's a public app anyone can find, and making people message you for it and restricting it to those with positive rep makes you look like a lame noob.

**Elitas** - September 18, 2016, 7:33 am

It's actually not a very well known website and I never claimed I'm some sort of a pro hacker, my names just for the lol's.

And, I'm sorry you feel that way, but I just want to give back to other who have given towards this community, since I owe this community a big thanks.

Hope you understand.

Not at all. All I'm saying is that this is for HQ members only. Meaning you have to give something to  
the community before you can take this method off of me.

I'm not wasting my time sending this to people who don't contribute to HF by doing giveaways.

If you want the method, do something useful, share something with us all, and then once you get a  
good reputation for being a nice guy, you'll be given this method. Don't try and suck up to me, then  
when I don't give you what you want you just turn on me, kind of looks back imho but again, if you  
want this method, contribute. ?

Thank for releasing your method to the public its a generous thing to do. Now I know I am not high quality I am actually new I just started here today. But I would give the world for this just to hear my moms voice on the telephone speaker whom I haven't spoke with in months in El Salvador. Not being able to call her and tell her what is going on in my life, it just feels very wrong. Honestly, I had no idea that I would miss her this much.I should be calling mom this evening, I should be sending her a birthday card and teasing her about being a grandmother. I should listen to her talk about how awesome her cats are. Instead I can't remember what she sounds like :(

I know I don't fit the requirements for the method, but I have 2.50\$ in my Paypal account I can send it to you in exchange for the method. Again if you have a change of mind its no problem.

That's never happened to me before, or anyone else who's used this method for that matter.  
Sorry, free call is not allowed to this number. Check our rates to make cheap calls.

This is what shows for specific countries (some have odd charges which the website isn't able to pay).

So for their own protection they block a few different countries, I know Albania is one of the affected countries.

This requires no credits/no data/no wifi?

Cause if it does you have something called viber/whatsapp calls :p

It requires you to have wifi, however the person you are calling does NOT need wifi.

This is therefore better than the likes of Viber/WhatsApp..

So you're telling me that thorough my iphone 7+ only by using WiFi i can call my grandmother

which has a nokia e71 and is located out of the country?

Through your PC you can for sure, idk about an iPhone. And it depends where you are/where she is.

USA can call USA/UK/Germany/Many more, and vice versa (can all from any of these countries to any of these countries).

Small countries like Estonia for example, would probably not be able to call to/from.

**Elitas** - January 26, 2017, 9:14 am
