Pay2Win rate -

I dont see this game as pay2win since i got all my gear by myself withput putting any single cent . The game is fun and you can get your gear by yourself without paying money , you just need to farm and spend time to be strong like i did :)

PVP System -

Hard to play pvp , took me 7months to be good at pvp you need to practice alot and you have to remember you class skills to make smart moves and think how to win your opponent.

Gear Upgrade -

the gear upgrade its OK , not too hard , ofcourse its hard to get max plus but you have to get ingame currency by farming to have your gear upgraded to the good tier :).

Guild Wars 2 -

Official website to buy -

<https://www.guildwars2.com/en/>

so , What it GuildWars2 ?

Game GuildWars2 were a continuation of the first game of a successful company Arenanet . The game is a typical MMORPG game , but not a game that reminds you play WoW or H & S as Diablo . The game has stunning graphics , and is bought and Play with no monthly fee !

The game has a receiving loot (items and money) is quite different , each player receives loot separately without the need or greed and sex . Very dynamic game , in which players can do some quests and suddenly go into a huge event in which an entire server tries to eliminate a formidable dragon . Part Events bring you full of loot when it is presented by a huge box .

The game has a Dynamic Events whose share has been explained above , but it is important to note that not only large Events after which get a huge box but there are also a number of smaller Events that entail only get EXP and money . The plot of the game , without revealing too much , starts when you help your race , and away you go up the ranks until that point you to the real problem , the UNDEAD , there is a huge dragon called ZHAITAN can resurrect dead bodies , and used his personal needs , and , of course, interested destroy all races and all sorts !.

You start as a story / life / production / Flower junior and slowly advanced to commander of all races in TYRIA (the world where the game takes place) .

Select Server :

You can choose between the NA that America and United close to her , or the EU that Europe .

All the characters you create will be in this world , that is impossible to create two characters in two different worlds .

Choosing world is permanent and can be replaced only by a world Gems (things you buy with real money or by converting money game you have accumulated) As the world more populated , so the amount indicated Gem higher .

It is also possible to visit other servers by Guest .

EU should be your choice in terms of MS (lag) lower . In the EU there are a number of German and French servers which are characterized by this German FR DE This Frenchman , and one server of Spain.

Race:

There are five types of races in the game : Asura, Charr, Human, Sylvari, Norn

The game has eight jobs / classes that you can choose from , each profession has different skills on the same weapons , namely , the Warrior has different skills with a sword Mel Ranger with a sword . Apart from the Elementalist and Engineer , all trades can replace a set of weapons, even in the middle of a fight (only among small with a time limit)

Warrior- most classical figure , has a wide selection of weapons they can use . And is one of the subjects considered also makes good DPS and to TANK . Wearing Heavy Armor .

Guardian - closest professional colleagues in support , with access to one of the strongest buffs Aegis blocks in the first attack , and a healing capabilities and they had had access to a lot of noses . Even professionals can serve Tank . Wearing Heavy Armor .

Elementalist- closest magician , he controls the elements of nature (fire , water , air , soil) but is allowed to use only one set of weapons . A profession considered the best healing ability . Wearing Light Armor .

Thief- similar to Assassin , they have access to Stealth (invisible mode) and is considered a profession DPS but even though he wears Medium Armor , is considered a profession in most defenseless .

Ranger- bow classic and beloved , a remote attack capabilities strong enough , and is not limited only to remote attacks it also has a close assault capabilities . And has the ability to pet fighting by his side and support him (there are a wide variety of pets that each one gives something else) wears Medium Armor.

Engineer- very interesting subject , the amount of weapons they use is very limited and one set of weapons, but it has access to bombs , automatic turrets , mines and anything that explodes in fact . Wears Medium Armor .

Necromancer- also classical figure , dead creatures can go serve it , using dark magic as blood magic . Wearing Light Armor .

Mesmer- Illusionist , a reflection of his ability to summon the enemy looks exactly like him . Wearing Light Armor

Pay2Win Rate -

GuildWars2 Become a REALLY pay2win game , so REMEMBER that this game is pay2win , you can buy upgraded gears , you can buy gold you can almost buy everything and be the strongest player in your server if you have money to spend on this game , i will not recommend to spend any single \$ on this game, beacuse everyone who has more money than you , gonna be more stronger.

PVP System -

To be honest , i love that pvp system one of the best pvp styles game i ever played but sadly he is pay2win so its worth shit now , to pvp you must practice without any knowledge you will lose all your fights , you need a brain , tactics and knowledge.

Gear Upgrade -

I have nothing to say since all of this game is pay2win with full players that giving their life to this game and spending alot of money per month to upgrade their gears.

I do not recommend to play this game , i just made a post beacuse someone ask to know things about this game.

Pay2Win Rate -

I dont see that game being pay2win in no way

I play that game with my squad and we get a STRONG gear by just play.. we are leveling together and we never put a single \$ on that game , my friend just put some \$\$\$ to buy a new skateboard there and cool outfit :)

So no worries , this game isn't pay2win , old game , cool game + no pay2win.

Exactly the perfect game that you gonna play ! :)

Gear Upgrade -

Well , the gear upgrade its easy, dosent require real money to upgrade your gear to the best and max plus , from +1 to 5 its easy (and +5 its good asfuck) , the other ones you just need a luck :).

PVP System -

Not the best , not perfect .. but atleast if you like this game , so you gonna enjoy from the PVP like i did .

The pvp is based about your gear , so beware with who you're fighthing overthere.

There is no overpower classes , there is only strong gear and plays , by saying plays i mean that you gonna dodge and counter your enemy by using your brain.
