Thread: [\[TUTORIAL FOR LEAKEDSOURCE HACKING METHOD\] \(HQ TUTORIAL NEWBIE FRIENDLY\)](#)

iLoveGaming - August 29, 2016, 2:39 pm

Hello,Its me iLoveGaming.

Today on my mind came this idea so i decided to make tutorial.

If you want to get emails / usernames from target website.

1.What you will need?

-google

-this dork: site="example.com" "noob" "@gmail.com"

-brain.exe (its actually so easy xD)

-leakedsource account (its best to do with 1 week supscription)

2.Explanation of this google dork

site="example.com" ---> target website

"noob" ---> keyword

"@gmail.com" ---> email service (can be @yahoo @aol etc.) + you can use like "my name" (if you want get names"

3.How to do it?

Copy this dork in google get emails and try it on leakedsource.

Hack account :D

4.Other method (for ppl that dont have money)

You can mass email accounts if you want spread botnet/rat :)

Enjoy

Thanks for reading hope i helped you:)

0 comments lul Many ppl here are just leechers..

So noone like this tutorial?

:(

Nice tutorial man, thanks for sharing! ?

iLoveGaming - August 31, 2016, 11:41 am

No prob :) Hope i helped .. Thanks for reading.

carloregidor22 - April 1, 2023, 4:21 am

Thanks man for sharing..... Love it.

HelloMan23948 - April 19, 2023, 4:50 pm

Apparently leaked source is gone but the domain shows that it's returning again this year in 2023 so that's good.

gikdnmanananan - May 2, 2023, 4:04 pm

thanks for tjis sksdhjfkksdfhsdjfkfhsdjfkfhsdjfkshfjksdhjksdfhjkhjksfhjksdfhjkhjnkcfvhjklhsdhjk
