Thread: [\[Spoof Private Script\] GrenSyn by Yubina. \[Uber/l33t\]](#)

Bescht - August 29, 2016, 9:44 pm
This is a script that has caused serious problems at OVH and VOXILITY in the last month/years.

If u want this script pm me. (No GigaBot lol)

Only l33t/ub3r.

Screenshoot of this fantastic script:

Is a nice giveaway for you guys. I wish I was eligible to get it just because I want to look at it and learn more from the code :)

unlahgo - August 30, 2016, 1:19 am
From the looks of it, the reason it works better than traditional scripts is purely because it sets TCP options.

Unsourcesd - August 30, 2016, 1:48 am
Edit: Not sure why it posted twice.

Nothing more than public scripts with a bit more of personalization, for sure, no more private.
Enjoy: <http://muonium.rgho.st/6FhnR27K2>

Holy shit can you fuck off legit, reading through this section and seeing you post gives me testicular cancer every time. You compare your shit paid for ampnide servers to other skids who run 2k nets. Any big boys who run Nets will outclass you easily without even having to think about it. If you feel good comparing yourself to small fries and showing you're the best, that's great, but do it in another fucking section you retarded, cancerous individual

Kurdish Hack3R - September 1, 2016, 5:06 am

i dont know why you sharing this to people ? and giving it for \$\$\$? while it free ? :-
