Theme is SupremeForums. What custom plugins do you have? There is literally no information on this thread at all.

if you need a HQ thread design hmu for my services, it can attract more people to your site.

I read a thread about users not having simultaneously sessions open or multiple tabs? Why not actually fix your stuff so users can navigate your site like a normal user.

SupremeForums is not a custom theme? Nonetheless, good luck.

Mainly because DemonForums uses SupremeBBs header image and Supremeforums old ripped

theme. CrackingMafia is running pretty much the same theme with the same ripped header image.
