Interesting service you have here, I would rather you didn't advertise on other threads though
Do you have over 1 thousand private dbs or just 1 thousand dbs in general
Any chance of trading? Or working together (I would need your db list)

All 1,100+ DBs where privately obtained.
However only around 500+ are "private".

Please PM me about trading/working together.

He has just over 1,000 files in a folder.
Claims they are databases
claims they are private

No list, no names.

Consider adding a list of databases you have..
Run this in your database folder
Code @echo off
for /f "tokens=*" %%a in ('dir /s /B') do echo %%~fa %%~za>allfiles.txt
pause >nul

We are still doing free lookups.
Hit me up with one of these things:

IP Adress.

Alias / Usernames

First name, last name, facebook profile

E-mail, any kind of mail (Everything from keemail.me 2 gmail.com)

Skype name

Instagram name

Anything that could be relevant.

Send a PM if you want the lookup, and i'll do it :)

I almost just added 20+ databases. They are broadly all private.

Send a PM if you would like to have a few free lookups, max 5 emails, 5 usernames, 5 ip address.
At all just max 5 of everything you need looked up.
