Thread: [Does a 100% IV magickarp evolve into a 100% Gyarados?](#)

NeedScans - August 30, 2016, 11:00 pm

As the title says, that's my question.

Why is this in botting/cheats? Because you can only see IV with botting cheats, so that answers that.

Thanks.

UAV™ - August 30, 2016, 11:10 pm

yeah thats how it goes, however moves will be different

.Astro - August 30, 2016, 11:56 pm

Yes. IV stays the same no matter what, but CP changes.

Coooooooooooooooooooooool.

Thanks guys! ?

This statement is false.

But glad you asked this question, it taught me something.

I didn't know that.

Then how do you know the IV?

deadpoolica - August 31, 2016, 1:05 am

I have an app called go calc on Android that reads your screen and puts the info needed to calculate ivs into the correct spots. Pretty nice actually even has appraisal inputs to make the ivs more accurate. You should check it out. Or find the equivalent for ios with Google
