Thread: [OTG | Orcinus Tech Group | Recruiting Elite Specialists | +Students](#)

Syracusia - August 31, 2016, 2:51 pm

Hello HackForums,

Today is the official announcement of OTG; Orcinus Tech Group.

OTG will become a group of the people from an extremely diverse array of fields all of which they are specialists in. OTG is being formed as a vehicle to find and build long term relationships with other experts so we can use these assets in synergy for all of our best interest.

As of right now are only looking for members which share the same following mentality; ambition, trust, and honor.

For these are the core values of OTG. Without all of these values existing at all times the OTG vision will not come to fruition.

We will grow and improve each other expediting our success extremely rapidly.

The vision for OTG is essentially a community of experts so you always have the best of the best available to you at all times. If anyone wants to start a project they can group up with other OTG members. I will also be creating official OTG projects which users can join in on for pay/stake in the company or just plain experience and something to toss on your resume.

If you believe you share the same vision and values you are welcome to apply.

The application can be either posted here or sent via PM for privacy.

Denied applications will not be commented on. If you are accepted you will be contacted via PM. If you do not receive a PM within 72 hours; you have likely been denied (this does not mean you can't reapply).

*As of right now we are also looking for students who may not be expert in anything; but have a lot of ambition and mostly just want to learn by doing basic stuff and being part of a project.

Application Format

Code How you want people to refer to you: [i]Nick[/i]

Your Abilities: [i]DDoS Mitigation, Software Development, Business Developmmment[/i]

Your Interests: [i]Starting Companies[/i]

How you want people to refer to you: [i]Haxor[/i]

Your Abilities: [i]SQL Injection, XSS[/i]

Your Interests: [i]Penetration Testing[/i]

Grand Master Hake - October 2, 2016, 2:17 pm

How you want people to refer to you: Jaret

Your Abilities: SQL Injection, XSS, Buffer Overflow, Social Engineering, Vulnerability Assessment (in many systems and programs), Exploitation, Sniffing, Spoofing
Your Interests: Penetration Testing

I want to join your group so I can gain more experience in the penetration testing field and also make some money doing so. I'm nowhere near being the greatest penetration tester out there but I'm pretty sure I'm not the worst, so I don't expect to be paid a lot. I know that I will never be as good in this field as I want to be but I'm damn sure going to try. If I don't know something that has to do with penetration testing, then I make it my mission to learn about it, and even the stuff that I do know I still strive to improve my skills at it. I know that you probably didn't need me to tell you that but I wanted to tell you all of that in the hopes that you will give me the chance to join your group so I can learn and expand my knowledge and maybe I will be able to expand someone else's knowledge along the way. Thank you for taking the time to read this and I hope that you will consider me.
