It's nothing special just wanted to see if a different border look would suit the forums.

Did 2 different colors because seemed white has a cleaner look.

Feedback is useful (If the picture seems shitty it was a rush).

Very nice, the layer style shadows could use a bit of clean up though.

Doesn't look bad at all, nicely done!

I like the second one. It feels well with rest.

The borders are killing it, good job. Looking real good.

looks nice overall. only thing i'd suggest changing is the hectic bevel/emboss (or whatever you've used) on the text. turn it down or at least soften it.

border looks nice as fuck and i really like it. mask is pretty good too.

also what's the blurred text under the overwatch text? looks unneeded and unnecessary in my opinion.
