Thread: [SpaceX's Falcon 9 EXPLODED!](#)

minimalist - September 1, 2016, 5:56 pm

FUCK FUCK FUCK!!!

Looks like SpaceX just got sent a whole 2 million steps back from their planned Falcon Heavy test flight ????????

FUCK!

DontQQSoMuch - September 1, 2016, 5:59 pm

Holy shit that looks horrible O.O

Winkie_Winkus - September 1, 2016, 6:13 pm

"All of these years of work will pay off guys! That government grant, me missing thanksgiving with my family, not being around my kids, and working myself to near death will pay off from this legendary flight!"

3....2....1.... liftoff!!!!

BOOM!

Shit.

?lixir - September 1, 2016, 7:50 pm

Sah-boo-tage! I wouldn't be surprised if this wasn't an accident.

?thereal - September 2, 2016, 1:12 am

They'll be back better than ever, we'll get there :)

Mr. Man - September 2, 2016, 6:16 am

Wonder if the company can sustain after this.

Monostable555 - September 2, 2016, 6:23 am

I'm glad that there were no injuries, Space X will easily recover and make next Falcon much better, I hope!

The explosion was quite spectacular!

minimalist - September 2, 2016, 6:24 am

(Sep 2, 2016 06:16 AM)Mr. Man Wrote: [\[CITE\]](#) Wonder if the company can sustain after this. Of course, Elon Musk runs that bitch.

KrazyHigh - September 2, 2016, 6:29 am

Bro that's fucking crazy luckily nobody was injured

Shoe - September 2, 2016, 6:32 am

(Sep 1, 2016 07:50 PM)?lixir Wrote: [\[CITE\]](#) Sah-boo-tage! I wouldn't be surprised if this wasn't an accident.

There's little to no motive in blowing up Falcon 9. What, the manufacturers of space ship parts are worried they'll go out of business with Falcon 9's presence? Yeah, already big-ticket companies will for sure fail after SpaceX can regularly land space craft after launch. /s

I don't think there's a conspiracy here, I don't think it's sabotage, etc. I think someone messed up and that's that.

SIM-3257834 - September 2, 2016, 8:12 am

As someone who works in aviation I can tell you something as simple as a O-ring can cause these accidents. Hoping I can manage to stay out of these accidents when I am at work.

minimalist - September 2, 2016, 8:45 am

(Sep 2, 2016 08:12 AM)Ahri. Wrote: [\[CITE\]](#) Hoping I can manage to stay out of these accidents when I am at work.

Uh...yeah...that's the goal.

mpete123 - September 2, 2016, 9:01 am

posted this right after I posted it.

DirtyBomb - September 2, 2016, 9:48 am

Damn fine explosion. Best of 2016 I reckon?

Farshad97 - September 2, 2016, 11:18 am

is this where my tax money goes too? people that cant build proper shit? fucking made in china

BR?ND?N - September 2, 2016, 12:07 pm

To the people who worked on this, watching it go up in flames is like putting stacks of millions into a gasoline circle and lighting it.

Damn

Chasun - September 2, 2016, 1:31 pm

My god this is intense. With earbuds out and volume at a minimum, I can still here the blasting of the pieces from fair distance.

Flxwn - September 3, 2016, 3:01 am

(Sep 2, 2016 03:24 PM)Hypnotist Wrote: [\[CITE\]](#) Retards couldn't even achieve that shit.. it's not exactly rocket science is it!

But sir, it is rocket sc-

SHUT THE FUCK UP BILLY

Papa Cuda - September 3, 2016, 5:42 am

That was literally like a whole 10 seconds before you heard the blast. That's incredible. Just glad nobody got hurt, which is amazing.

minimalist - September 3, 2016, 5:43 am

The land's really flat and the camera was something like 2.5mi away from the site.

Undefined - September 3, 2016, 6:12 am

Damn.

I'm not really familiar with what this rocket is. Were there any people in it when it exploded?

Ice Poseidon - September 3, 2016, 6:13 am

holy fuck that's scary omg

Granny Bacon - September 3, 2016, 6:14 am

Soon ISIS will claim responsibility for this explosion

minimalist - September 3, 2016, 6:20 am

Damn.

I'm not really familiar with what this rocket is. Were there any people in it when it exploded?

No, it's just an uncrewed 2-stage rocket that delivers satellites and the Dragon into orbit. They won't be putting people in this rocket until 2017-2018 ?

<http://www.spacex.com/dragon>

frank8292 - September 6, 2016, 4:27 am

oh my god,.....
nevermind

DrMikeHunt - September 6, 2016, 12:48 pm

As a huge Elon Musk fan, this is super disappointing but its hopefully only a "minor" setback

deskiao - September 6, 2016, 2:37 pm

Of course, first there are no injuries. We can all make mistakes, and they learn for next time.

We'll see...

Nonon Jakuzure - September 6, 2016, 11:44 pm

People act like rockets blowing up is something new.

You know how many Saturn V rockets NASA blew up just trying to send men to the moon? It's a process of trial & error and mistakes do get made. Launching rockets isn't as easy as Kerbal Space Program makes it out to be.

EDIT: Also this post got me a random award. Nice.
