Thread: [\[WTB\] Private Cheat / League Cheat](#)

Madz97 - September 2, 2016, 5:15 am

Hey guys.

So i have some questions.

Q1:

Wondering how much a private coder would charge for a cheat monthly that max. 5 guys would use. Only has to be aimbot, aimkey and triggerbot. No ESP or any of that shit. The cheat has to support, ESL, ESEA, FaceIT and CEVO. How much would this be?

We would be willing to pay a monthly amount, but we can discuss this, as we have some plans with this.

Q2:

My option 2 is to buy a cheat that support the different leagues, ESL, ESEA etc. But i dont know any good ones that dosnt get detected often. The cheat has to contain same things stated in Q1. Any good ones? Thought about organner, but they are closed it seems?

Hope you can help med out.

How beefy is it gonna be? Estimated.

Is it better with a cheat that a bit more people has?

So we have to get a cheat that a good amount of peope has before its worth it?

no if you want ESEA you need a cheat no1 has and the coder will update it daily. It will take an initial down payment of \$2500 or some shit. Then \$250 monthly or something

Alright. Thanks for the answer bud.

There's no chance of getting a ESEA support cheat otherwise then?

correct

Flaws. - September 2, 2016, 5:38 am

I can do you a ESEA client for \$7000.

It will be a one time payment and a private build for one person, it isnt me that makes it keep in mind.

So what if we then only need a cheat, where we are able to cheat at lans. Might be Faceit too, dno yet. But the most important is that its lan proof and its not getting detected. With same features ofc. ?

You realize the kind of budget you will need for this?

Because i feel like you have no idea what your dabbling with here

Yea i know, but they are using it at lans.

But with public cheat is the best to play with legitimate?

Vuno - September 2, 2016, 6:52 am

\$120 down. \$35-45 monthly.

I think we are down for this actually. This is pr person right?

Le0ric - September 2, 2016, 7:10 am

2500 for 5 people would be lowballing it probably gonna cost you 10k+ to support 5 people.

lyfelines - September 2, 2016, 7:40 am

you dont need all 5 people to have the cheat, just 2 at a time.. rotate it around, let 2 different people use it each game, so the carrying goes around and doesn't look obvious. Cheaper and less suspect then an all star team with no background. I know a local lan team that does that to keep individuals off all the time radar.

Kubrick fam

\$50 says that OP buys from Vuno then makes a thread in around 2 weeks complaining he got VAC banned

cr0n1x - September 2, 2016, 9:48 am

Or you get some friends that happen to be fucking goodass coders. Hope they aren't lazy af though like mine.

Justlookinglol - September 2, 2016, 10:01 am

If you're willing to pay \$7000 for a esea cheat hit me up. Lol I usually do it for less than half that though.

C00000000000000N - September 2, 2016, 10:55 am

Jesus Christ 7000\$... don't know who told you It'd be that much but thats bs.

I pay 500\$ a year and can play ESEA/FaceIT etc. just fine.

Nah comes from a somewhat respected german coder (not Supex0 or Koin).

Price is decent, not the best hack I've ever had but it works and is undetected since I bought it years ago.

King-orgy Maybe? ?

I can create a DMA cheat that is UD on ESEA/FaceIT for radar only. Only one person will need to run the cheat, and all five can see the broadcast online. The hardware alone is more than \$700, so the prices will be quite high. I'm thinking \$1000 upfront and 2 months to develop it, and \$500-800 a month after that. I can add in an aim assistance as well.

I can go as low as \$1000 upfront and \$500 a month. I can create a simple radar hack via DMA for you pretty easily.

Why are you bumping a post 2 years old just to advertise a public source

Don't buy this, it's public source probably.

Nope, not pcileech. It completes the same functions, albeit completely different from that.
