Thread: [\[Never was\] Free video editing service ! | Games | Products | Limited time](#)

Lufasu - September 2, 2016, 10:59 am

(not my edit , used it for the logo) How are you , today I decided to take out a project of free video editing community members .

I 've not edited videos a year .

So that's a bit forgotten things , but I still remember important things that need to be in the video .

So , do not expect the best editing you saw , expect something basic .

What do you need to send me - CSGO -

Send me a demo link to the highlight match

Option number 2 - Record the demo with 60fps (shadowplay / fraps / etc) and send me the DL link.

Battlefield 4 -

You must record your highlights by shadowplay / fraps to send me them.

i dont think there is any match saving system on battlefield .

so make sure to record it on 60++FPS with HD settings .

and sending me the DL link.

Call of Duty BO3 -

Same as battlefield , i dont play alot COD so i dont know how the match saving system (if there is any) working .

so same , make sure to record on 60FPS with HD settings and sending me the DL link or either COD have match saving system , send me a direct link to the match.

Overwatch -

Same as battlefield , there is no match saving on overwatch , so make sure to record it with 60++ fps with HD settings.

Another games -

Record and send me download link .

Again , make sure your recording fps is more than 60fps and on HD settings.

1.by sending me download link's make sure its from mediafire.

2.With every download link , make sure to tell me what do you want on your video.

3.I didn't edit for an year or two , so as i told you .. i got PC that perfect for editing so i can get back to buisness slowly.

Products videos -

I can also make products videos by recording my screen and put full explanation while the movie is

running.

What do i need for this -

Product key / access

Information from you about the product and how to use it .

Unixroot™ - *September 2, 2016, 11:09 am*

Reserve a spot for me mate.
