Thread: [Predictions on ETH](#)

GloryToBe - September 3, 2016, 9:18 pm

I'm going to be investing a bit of money into ETH. I want to know what your predictions are going to be on the value of ETH in the future, do you think it will skyrocket like BTC did in 2014 or become worthless? Let me know your thoughts.

If ETH goes to \$100 from \$10 that's a 10x profit, that would be nice.

TheChi?f - September 3, 2016, 11:33 pm

Idk about eth anymore. That hack fucked them up a bit. I'd just invest in XMR in the meanwhile to make some quick bucks

I only have BTC and ETH atm

I'm all in ETC at the moment. I see ETC going to \$10 rather than ETH to \$100.

Yeah, also heavily invested into ETH right now. It's gonna be huge.

Mmh, personally I see a lot of potential for ETH to have a few big bubbles, just like BTC did. That went all the way to \$1000 a coin.

lol:

<https://bitcoinmagazine.com/articles/millions-of-dollars-worth-of-etc-may-soon-be-dumped-on-the-market-1472567361>

better move along now before its to late.

ETC is going no where and even if it does, DarkDao will come and haunt all of those suckers who think it's actually going to kick off the ground and it'll eventually crash and burn

G^aNNicus - September 5, 2016, 4:22 am

U think they guy is going to drop his millions in one day, and sell @ low rate. Or would u sell in small amounts at higher price so that the market doesn't collapse.

And since 2 sept. the price has been steadily rising.

I do think ETH is good investment to.

lol.....

you're saying if you had millions sitting there you'd be slowly selling every day instead of dumping large chunks for cold hard cash?

just wait and see, as soon as the price starts increasing it'll go right back down.

G^aNNicus - September 5, 2016, 5:26 am

24 hour volume is over \$5 million, why would u instant sell millions worth of ETC @ MUCH lower rate, and collapse the market, if you could sell less every day without altering market price.

ETH has so much going for it, there is only one way to go. Forwards.

JUAN9087™ - September 5, 2016, 10:57 am

If I had some spare money I would put in Eth and Bitcoin, maybe also in Monero

Internet Bully - September 5, 2016, 12:21 pm

I'm thinking about throwing some money into ETH.

because if you're a hacker and you've just taken millions of ETC, you think the best interest of ETC

is at heart?

And no, it doesn't happen with every coin, not every coin has 5% of its total supply stolen and has the potential to be dumped at any time.

How did you purchase it? I looked into buying it right through coinbase, or exchanging btc to eth with shape shift

I bought it from [Productivity](#) using BTC.

Internet Bully - September 5, 2016, 6:04 pm

I just bought 4 eth on shapeshift.io will let you know how it goes

EDIT: that was quick lol <https://gyazo.com/15f07c8ef25eec394ee7a507c3bd9baf>

Yup, Shapeshift is really convenient as an exchange along with the wallet. We'd rather not download a 50GB blockchain, haha.

Productivity gave me a quick an easy exchange so I don't need to go to Shapeshift.

No, it isn't.

Why the fuck would you care about maximising profit if you got all of that money for free? Who gives a shit about a couple hundred thousand difference when you have millions you can get instantly in cold hard cash?

The hackers don't give a fuck about profit they get there money and leave. Just like every hacker

before this one.
Just you wait.

It would be smart to hack, run, then rinse and repeat.

At \$50, I should've invested more.

I only had a couple at \$10, I was contemplating buying more but it stood at \$10 for so long that I didn't think it was going to have much of an increase.
