Thread: [PokeMobBot Best Config?](#)

Teresa - September 3, 2016, 9:24 pm

The current config i'm using is decent (botting 51 accounts, only one temp ban), but its only 20k xp per hour

anyone have a good like 30-40k one I can use? want to see if I can speed this process up a little bit

No you should stay at 20k xp per hour, any more then that is too much.

What proxies are you using to bot 51 accounts may I ask?

Mewtw? - September 4, 2016, 7:26 am

I don't modify the settings.

I just change the location to SF.

I am getting between 50k and 200k per hour for 1 week and no ban so far

That seems like way too much XP per hour. What level are you on now after 1 weeks of botting?

I have been botting 1/2 days to get to level 25.

I'm surprised you've lasted that long... What bot you using? I've given up botting atm as I keep getting banned after a week and that only running at 20k xp/h a few hours a day!

I have bottled 5 accounts which didn't get banned from botting 20k XP per hour.

You must be doing something wrong. have you been changing the device ID/IP every time you bot another account.

This could be the issue.

I change the device id and everything but I think its because I play the account i'm botting on my phone as well so its probably the constant changing of device id getting me banned.
