No subtitles addon on this ?

Web_Development - September 5, 2016, 5:38 am

Why is the script encrypted in base64?

.Satellite. - September 7, 2016, 4:04 am

Just letting everyone know that this does include pirated content and may be illegal in MOST areas.

MangSamhadi - September 7, 2016, 5:31 am

What about subtitles? Is there any addon ?

Matt Honest - September 7, 2016, 5:33 am

(Sep 7, 2016 05:31 AM)Kleoz Wrote: [\[CITE\]](#) What about subtitles? Is there any addon ?Try this

"I have the subtitles on the pulse ccm build. I went into settings video and down to subtitles. Scroll down to movie and select it. It opens up with NO subtitles. Your only option is to hit the GET more button and from there you can select from a multitude of subtitles. I hope this is your only problem. If not it most likely is the build. But working on my pulse ccm build and tv fire guru. "

No problem man. Thanks for sharing this though. It also works on mobile somewhat but is harder to navigate.

Matt Honest - September 7, 2016, 6:16 am

Hey man, you actually don't need a specific addon to use subtitles. They are available in (nearly) all addons. Drop me a PM and I'll talk you through how to enable them.
