Probably you should do something everyone else is...

Text Lyrics Pranks / 100 layers of something.

Maybe you should try promoting the video.

Also you can do it with BOT(s) which can help you in Ranking your video.

Go "Social Networking Services" and help yourself.

I remember a few years back when there was a mobile view bot, I got 300k+ Views in a few hours.

Most were real views too, as it was a music video for a music channel and was ranked one.

Ranked my video to the top and gained me a shit ton of subs.

They were the days!

You can buy views, or you can use autoclicker softwares.
