Thread: [looking for someone very good at editing text in photos on photoshop](#)

nerd_beater - September 4, 2016, 5:55 pm

need someone very skilled at editing pictures, not making new gfx like logos etc. i have a large number of pictures (they are real photographs of an item) and they all need one small thing changed about them. pretty much one word that needs to be changed to something else on each picture, some have a couple in each pic. there are 90 pictures. this will take someone pretty talented. many of the pictures are different lighting/angles etc. it needs to be done good so even when zooming in you can't really notice. i will decide on the person who gets the job based on their skill editing the sample pics and the price of their quote. you'll be sent 2 sample pictures and you can change the text to whatever you want.

post your quote in the thread, do not pm me or you will be ignored. i can't send pms so post your skype name in your reply or pm me your skype name after you've posted your quote.

starting quote \$20

You are probably going to have to pay someone more than 20\$ for this... Alot more. This is at least a few hours of work

I would definitely be interested in this if you can negotiate a bit on the price. It's a TON of work for \$20. Skype: "Aelear" if you are interested in talking more about it.
