Thread: [\[Tutorial\] How to make money from online casino without betting](#)

Mr. Poopybutthole - September 6, 2016, 2:34 pm

This is my first thread on HF, I've been using this method for months, hope you like it =D

How to make money from Online Casino without betting

Requirments

- Affiliate account on betting sites (I will not get into it, google it yourself)
- A website (optional)
- A BlackJack card counting software (you can easily find a free one online)
- Budget for advertisement (recommended, \$20 was my first ads budget)

Now we are ready, let's start making some money\$\$

[Step 1] Setup your website

I assume you have the ability to search on google, so I'm not getting into how to setup a website. It doesn't have to be a website, it can be a blog. Use a good looking Wordpress theme, and show how you can win BlackJack in live online Casino by using card counting software. Make sure your website/blog looks professional.

[Step 2] Insert your affiliate link

If you think you can just put your affiliate link there and someone will click and gamble, maybe you are too naive to be on HF. Say something like "Most online casino site will detect it if you use a card counting software from your betting pattern, these are a few websites that won't." Even a 9 years old can tell if its an affiliate link, download a plugin like Pretty Link to cloak your affiliate link.

[Step 3] Traffic

Yep, we all hate this part. There are a lot of tutorials on HF that help you get traffic, a small investment for traffic is recommended. \$20 was my first investment, and I got at least an average profit of \$30/day from this method until today. You can easily find my site by google "Blackjack card counting software"

----- Thank you for reading

I saw many people complaint about useless money making ebooks on HF. Please keep in mind, all method shared/sold online is merely a reference. If you think you can make bank by following some online ebook, you maybe too naive. The real way to make money is to keep learning, and come out with your own idea.

feel free to shoot me a pm if you have any question =)

This is a wonderful first thread.

Perhaps in future to prevent methods from becoming over-saturated you could try adding some requirements to your method giveaways!

Why would you suggest using affiliate link, instead of playing blackjack yourself using the card counting software? Possible risk of ban?

You will end up losing all the money if you play it yourself. The house always win, if it works, there will be no more online casino.

By the way, the risk of ban is just a bullshit that trick visitor to click on your affiliate link. No online casino will ban their players.

This is nothing new of course, basically a typical niche website but for casinos.

But still it is a good and straightforward tutorial. And seems to help many people from what I've read in the previous posts. Just remember that click prices for casino keywords are insanely high, so PPC traffic from AdWords/Bing Ads will be hard to get.

It's a nice one ! I'll look into it ;) Thanks for the share man !

You are right, the click price is higher than others, but the commission is very high too. They pay minimum \$60 per sign up and up to \$200 sometimes.

I am bumping this up as this information is incorrect. Any players can easily get banned at any online casino if the wrong tactics are used. This is in their terms which should always be read before any wagers are placed.
