Guess what happens if you're not satisfied?

No hard feelings (?) but you'll get the full amount back if you aren't satisfied or you don't find any value within 30 days. No bullshit, no drama. It's five bucks.

Absolutely. Sent the last vouch copy. Thanks!

Thanks for the vouch copy, below you'll find my review of the product :)

The e-book itself contains 74 pages of detailed information. In my opinion, even a total newbie could learn about PHP from this e-book. I miss pictures from it, the plain text is annoying a bit, also the codes/scripts/examples could have been highlighted way more. I guess the information inside compensates for that though.

I'm not sure about OP being the author, but if he is, then it is worth the \$5 investment :) Good luck with the sales ! :)

I got a vouch copy and here is my review:

After reading the whole ebook I can confirm that all the pages are well detailed with step by step

instructions on php and more. The ebook is pretty lengthy so if you were to buy be prepared for a long detailed read. Personally I would have liked a bit more imaging and some diagrams to help the readers out. In the long run it has a bunch of good details and can work if you put some time into it. Its only \$5 so heck you can't get something this well written for cheaper! Good luck with sales!!!

There is an obvious answer to this question... but, does your eBook teach anything other than what can be found [here](#) or found with a little more searching?
