Hey Everyone,

I have come across a fresh offer where you get unlimited .com domain names at just Rs 79 or \$ 1.19 each.

ICANN fee is applicable, so total amount is around \$1.37/Domain.

I have tested the site, and it worked well for me.

Here is the URL -

Code <https://www.everdata.com/com-domain-registration/>

Payment methods available are - Credit Card, Debit Card and Direct Cheque Deposit.

Sorry, no PayPal :(

Are you then able to transfer these domains to other registrars? What's the price on the transfer?

Cheers,
Monster
