You dont know what game to play? this thread is for you to find and meet a cool and new games based on MMO!

Lets start -

Allods Online

Spoiler ([Click to View](#))

Allods Online is an online role-playing game Mass MMORPG , developed by Russian games Astrum Nival behalf of , the company has invested in about 12 million (!) One of the highest amounts invested in free .

Yes you heard right game Free to Play , absolutely free , and has the Item shop , shop with items that can make your life more easy in exchange for money (real of course) , but it is not obligatory to play the game , and it's entirely possible to get to the endgame and participate raid the bosses and all without spending a penny .

Globally game information

I take it that people here understand mmorpg chat , so I will not be delayed on this . (Eg what this tank)

- Developed as stated by Astrum Nival , Europe is marketed by Gpotatos their hands several more successful online games .

- Acting out large updates every couple of months , the last was in May and raised the maximum level to 47 and added a lot of content to the game .

- The maximum level is 47 now , in July out of a big update probably will raise the level to 50 .

- The game has a rest , you get a certain number of points each day , and they function as a bonus to your experience points , level up so easy , despite that it actually made the game limits you during the game because once you run out of points of rest do not get a bonus .

- There is a PVP game , there are large areas that PVP combat them open , Arena etc .

- There are many other things Instance and Lriidim and groups .

- There Mounts , it is possible to marry (Oo) , and a lot of different things .

- There is a lot of loot in the game , many types of armor and weapons , lots of degrees white - green - blue - purple - orange - yellow etc ..

- The graphics of the game is very similar to WoW game like this , whoever loves this style carton feel at home ..

The game's plot :

Saranut (Sranot) , a big world , quiet and beautiful creatures that live far developed :

Humans industrial and building large cities of developed and developing economies strong

Alps sages constantly stretching the limits with their powerful magic and dangerous

Orcs compete with humans for control of the world and building a massive war machines

The Arisen God dead live underground and stronger day by day with the help of black magic .

And the gibberlings they simply enjoy their simple lives .

Atlantica Online

Spoiler ([Click to View](#))

[img]http://www.dotmmo.com/wp-content/uploads/2011/04/atlantica_mmo.jpg[/img]

Ndoors company recently acquired by Nexon but only in the last two months Nexon began to move the game's server -so- familiar (unfortunately) atlantica online to them so let's get to know you atlantica online

atlantica online was also a game of IJJI but Nexon bought it from them

So now atlantica online its officially nexon game.

Atlantica Online is a multiplayer game TBS (turn- based strategy) that the eh Pat monsters she turns (sounds pathetic and mentions the Pokémon but it really is not)

This is your battle (click [here](#) for image)

As you can see, your player is on the right .

Once I chose one of the mercenaries (detail below)

I can attack one of the monsters that exist Molly (pictured yellow - brown people)

As soon as I and all my mercenary (who contributes attack) attack ,

The line moves to attack the opponent .

The game has you choosing between a variety of weapons and mercenaries .

Game you have the option of 9 main (your main player) and if I'm not mistaken 28 mercenaries or you can buy them with gifts and persuasion to get them to be with you

Your options in the main are :

1.main sword - using the sword

2.main ax - use ax

3.archer main - user request

4.main gunner - using mostly

5.main spear - a spear user

6.main instrument - using an instrument (guitar)

7.main canon - using a cannon

8.staff main - using a wand

main power saw - use a chainsaw (it can be opened after you have one player Level 100)A

mercenary (merc also call them) have the same potential that the main and more

At the beginning of the game (in Tourtial) you look to choose 3 merc will be with you for a long time

But to reach mercenaries stronger you'll have to levels that not all mercenaries will be open to buying from the start .

The mercenaries You will also need to improve levels 20 50 80 100 and 120

You'll have to improve special stones for each level and each merc

For example at level 20 you'll have 50 Ashen Crystal to improve D grade merc

What is it D grade ?

A mercenary divided into levels according to their strengths

For example, a sword is considered one D grade .

More on the levels and types of mercenaries you will find this site

<http://atlantica.wikia.com/wiki/Mercenary>

At level 1 you will get 2 Mercenaries

Level 2 will have 3

You will have 10 level 4

Level 20 you will have 5

You will have 30 class 6

You will have 40 level 7

You will have 50 class 8

(Together with you out level 50 you have people that maximum 9)

Blade And Soul

Spoiler ([Click to View](#))

Blade & Soul started out somewhere in 2007 at the games " E3 " When he released the first trailer for his turn up out of nowhere .

The game Blade & Soul exhibition are raised and made them stand up and clap , and rightly so , NCsoft never disappointing . The trailer seemed so incredible that the entire world was waiting it out .

In 2011 the game was the first in the Closed Beta in Korea , the game was followed by thousands of players who bought overpriced express entry . In August 2011, the Closed Beta came in second where tens of thousands of players playing . In June 2012 went to the beta - way game in Korea , where he played as - is no less than 150,000 players ! This number is crazy , a number that no one had expected , especially now NCsoft !

The game was initially free, but is now free . Of course it is impossible to play the Korean version unless you buy a user , you can try to register , but did not succeed due seeking protection systems details such as the number and identity card , korean phone.

The game has 4 races and they are : Lyn , Yun Jin , Gon

Yun- is the only race of the girls , and they can be Force Master Blade Master, Kung Fu Master .

Men and women "Gon" - huge ! Can be Destroyer , Kung Fu Master, Force Master .

Jin -
ordinary people , can be male or female and can be Assassin , Blade Master, Kung Fu Master, Warlock .

Lyn- young people with ears and tails can be a man and a woman and Summoner , Force Master Blade Dancer , Warlock

In the game there is 9 Classes -

Blade Master-

tank is a kind of official game but he can do Crazy damage and has many CC with Knockdowns , Stuns , Knock Ups and they also block and much more

--

Destroyer-

using a huge axe , they have lots and lots of AoE CC they can catch Mobs and Boss with their Grab the

--

Summoner -

Summoner has is familiar (cat) that can take damage for him and help the team , also summoner can heal and make TON of damage.

--

Force master-

less or more than the mage of the game have a lot of crazy Utility and Damage

--

Kung Fu Master-

Hardest class in the game , he uses his fists to attack armored and has a Damage Output Block and excellent , classic fast and requires knowledge by using his combos for Damage to the maximum .

--

Assassin -

this class could become invisible , and has crazy damage , can one shoot on PVP

--

Blade Dancer-

type of Archive of the Blade Master has no block has less hp , but it has more crit and many Utility and Damage .

--

Warlock -

Second mage on the game , can curse you and stun you forever if he know how to play, i call him "the cancer class".

--

Soul Fighter -

Sorry guys , Im not familiar with this class.. so i gonna make it short .

Its a Kung Fu Master , Mixed with force master thats it.

Black Desert

Spoiler ([Click to View](#))

[img]http://www.thelynennor.de/wp-content/uploads/2015/10/Black-Desert-Online-Logo-Gaming-Cypher.png[/img]

Black Desert Online BDO for short , is a new MMORPG game from Daum .

Black desert has been relased to EU | NA regions not long ago , what make this game more popular and raise DAUM money earning.

The game is now available to purecash on their official site which i gonna put on the end.

Jobs and races in the game -

Sorceress - Human - Female

Human -year-old witch . This game witches often attacked point-blank assisted by witchcraft to move from place to place quickly without the enemy will have time to get on those tracks . Of course there are witches powerful spells that are imposed on the enemy from a distance and the Magician know to combine the skills of attack from near and far to bring out the best .

Ranger - Elf - Female

Alpine breed irises . Irises assisted by a bow and arrow to attack powerful enemies and use their legs from agility to dodge . The iris has also strikes at close range , but often attack from a distance .

Warrior - Human - Male

Human warrior . The fighters are a very important group wants to explore the world . Warrior 's high defense coupled with its protective right can bring enormous protect him and his teammates . But defense is not the only thing that characterizes the warrior , its attacks , strong speed combined with high protection can pose a real danger to his enemies .

Giant - Barbarian - Male

Breed giant barbarian warrior . These warriors are ruthless and emotions . Hold 2 weapons in their hands and punching power everything in their path . Believe me , you do not mess with them when they're nervous .

Thats it for black desert since i dont play that game much .

Just a TIP -

Grinding is the best way to level up ;)!

Conquer Online

Spoiler ([Click to View](#))

[img]http://4.bp.blogspot.com/_IECL1fsSGbU/TGoG_9R0Val/AAAAAAAAABY/LqWl9IPrwKU/S1600-R/newlogo.png[/img]

First, Conquer Online is a game very similar to the MU magician and stuff ..

Role playing hard in order to reach a descriptive depends on the server or that the server where the global game's end after plowing can be about 3 years on the game .

Most state which in many games CONQUER globally too, as well as private servers is " Egyptian " .

With the world's most famous servers are Egyptians.

Classes -

Warrior -

Warrior more defensive than TROJAN can use a sword and in the other one can use 40 Star of

fraud .

2. Trojan -

compared WARRIOR warrior can use two swords from level 40 all hand sword is considered as a most powerful offensive game similar to NINJA power .

3. Pirate -

Pirate powerful and able to attack several simultaneously .

4. Monk / Saint -

a spiritual power can attack with his spirituality .

5. Fire Taoist -

a fire mage 's powerful magic attack can participate in all kinds of spells such as hurricanes , lightning , fire , meteor and various elements of fire against whom he fought .

6. Water Taoist -

water magician and a weak attack usually use it a few battles over how much or how the first people he can revive , strengthen their power , to strengthen their precision sheet .

7.Archer -

bow , users typically request to find the good things that he has a weak attack against persons and a medium attack on the animals and can attack many monsters come at the same time using his skill SCATTER .

Stats -

Spiritual strength : Monk / Saint

Physical strength : Ninja / Trojan

Defensive power / Help Group members : Water Taoist

Force attacks with magic : Fire Taoist

Finding good things the fastest speed : Archer

The game is kind of dead , i will recommend you to play on private servers and dont waste your expensive time on the official game , beacuse its all whole pay2win , alot of non english speakers (most of them speak arabic) , Non friendly community , You cannot join a guild without be pay2win character And also all the items over there like costing real money , people actually sells them for paypal / wu / btc , so please , go to a private servers and dont waste your time , find your best server and community and start having fun there :).

Dungeons and Dragons Online

Spoiler ([Click to View](#))

What is actually DDO ?

Dungeons & Dragons game Online Game Box based on " Dungeons & Dragons " .

Although DDO is based on " Dungeons & Dragons " are still different in their mechanics .

People tend to shy away the amount of information you need to know to be a good player with a good figure in the game .

This cluster measure gives a little taste , but still difficult to describe the mechanics of the game .

Those who are interested to know more feel free to contact me Pitch

Game very strategic group .

In DDO can get to level 20. (maybe more.)

Each level is 5 degrees . So there are about 100 " levels " in the game .

It does not end there , is a large range of possibilities .

You start as a people rescued from the crash of the airship was attacked by a dragon . And so you come to the village Korthos .

I will not talk about him , because he low levels and can finish it in a day , but it is very exciting for the first time , and I do not want to do here Spoilers , that the more you do the more missions you will see worth Ashkara spend 2 minutes to read the Lore of the task that the setting has a very good story . (For those who want to know more- look for Eberron Google)

Stats -

DDO often be more complex than other games I think many issues , one of which is The stats .

DDO contains 6 features that make up your player .

STR :

describes physical strength , useful add- attack , and damage . Intended more Kapap . (Face to face battle .)

DEX :

describes agility . Attack extension of additional arcs according to this feature . It is useful Ldrg"s high (degree of armor)

With light armors . In addition, the states saving response . (Reflex)

CON :

Your life expectancy . As you will have more on this feature, so your HP number will be higher . Again , useful Kapap .

In addition, the states saving toughness . (Fortitude)

INT :

You can call it a basic smart . The ability to deal with certain situations . High INT will give you more Skill Points (described later .) A key feature of (Wizards) wizards

WIS :

wisdom . Sets about saving your desire (Will) and a key feature for - priests (Clerics) , a few more classics this is another key feature .

CHA :

charisma , leadership skills . A key feature of the Wizards (Sorcerers) and the troubadours (Bards) .

Sounds like maplestory huh? :D

Skills -

Skills in DDO are not like the rest of the game .

In DDO skills are as :

spring

Search

stealth

Diplomacy etc ...

When you create a player , you will get Skill Points that depends on the amount of your hopscotch ,

your race , and the amount of your INT .

Sometimes your hopscotch not specialized in certain skills , and you will see an asterisk next to the skill like this happens .. For example :

No specialized skill Fighter " Search " Therefore , when you open the Skills window , you will see an asterisk next to the name of the skill .

Classes -

Fighter :

specializes in all groups of weapons (except the elect ; shuriken , oatmeal , etc.) is considered a protector , with AC (Armor Level) high (usually) .

The Fighter is divided into 2 groups :

Kensei \ Kensai:

Fighter can choose weapons , and master with him to the end . Receive bonuses to attack and damage , and you will find someone more trained him with his weapon . This role can do damage while the defense keeps nice . Recommended for beginners .

Barbarian :

Barbarian is one of the classics that do the most damage in the game . HP is characterized by a lot , and as I said , a lot of damage .

Usually wear relatively light armor , they can not in heavy armor , low protection . But the armor of the Barbarians is the amount of their HP .

Usually you will need a healer next to you , that your life went pretty fast .

Barbarian has a relatively different division . All barbarians have Rage adds them lots of STR and CON same time , and some may like : Frenzy and level 18 Death Frenzy .

Division :

Two Weapon Fighting : mostly dwarves , will use the Dwarven Axe (Dwarfs have automatically expertise with this ax , he is at one and the elite .)

A weapon in each hand , and validated faster .

Two Handed- Fighting : usually use an ax or two hands one weapon .

In summary , proper construction they will do the same damage ... depending on what style you more connected . (Although it is tempting to start with, not recommended for beginners , that barbaric much better with 32 points)

Paladin :

Holy Knight .

One of the most complicated subjects in DDO , the most powerful but good construction .

I do not even fully understand them yet .

Really really really really really really really really really really really really really not recommended for beginners . Very hard to build .

If you play less than two years, I'd recommend you go to the other classics . Even you think you came out good , trust me , not out . xD

If people really want to dare , I'll add a narrative about editing.

Monk:

This classic rising point, I would highly recommend it. He characterizes all the DPS in the game, and the monster of damage.

Monk (Monk) Becky uses to carry out its capabilities.

Divided into 4:

Fire Stance: extension to STR. Re Ki every second. Featured Chmtzb does more damage than the

others .. Even though I refuse to follow this stigma lol

Wind Stance: Add-DEX. Validity much faster. The higher the speed improves Stance improving.

Of course, the extension to the DEX affects things like AC, Reflex etc.

Earth Stance: Add-CON. Key innovators in this state for any offense that hurt you. A bit difficult for monks begin but as a whole lot of fun.

Ocean Stance: Add-on WIS. More bailouts, as an attack ... is not advisable to base your monk with this situation.

Cleric :

Every game has a cure , even here there . (Divine)

Do not get me wrong , healing in DDO is not weak like that ... On the contrary , one of the strongest subjects in DDO . Showering meteors , instant kills , etc ...

Highly recommended for beginners

Its key feature is : WIS

Featured Chkls healing . Very good against the undead . (He cures them xD)

What really does not elaborate further , Tacheles pretty simple and powerful Class .

Wizard :

Wizard . (Arcane)

The only classical can learn the enchantment of the Arcane .

Characterized by a lot of different magic , but less than the Sorcerer SP (detailed later .)

Key feature : INT

Is divided into two :

Necromancer :

Undead Wizard specializes in , can steal al- dead , controls the Undead .

Archmage :

Featured subsided it does not use much SP to perform his magic , some of them can Depart without using SP . This part is new in the Wizard .

Sorcerer :

Sorcerer (Arcane)

Featured lots and lots of lots and lots of SP (great fun .) And less selection than the magic of the Wizard

The Sorcerer yet there is no difference .. I think should leave something new in the next Update . But still very fun to play it , and is recommended for beginners . The key feature is (Charisma (Cha

Rogue :

This is a Thief " we called in DDO .

Neutralizer traps , opens things locked .

Creeps , jumps , dodges , there is nothing he can not do !

More damage to enemies not pay attention to it (optional stealth , Monster can attack the Barbarian , for example , and so is the Barbarian , and you get more damage for not paying attention to you .)

I'll stop here because i reach the character limit, if you have any questions for another class let me know :)!

Dragonest

Spoiler ([Click to View](#))[img]http://dn.cherrycredits.com/img/logo.png[/img]

" Dragon Nest " is a Korean -style role-playing Hack & Slash (ie , directly attacking the monster , do not select it) . The game offers players many things , such as a " PvP " , bosses , Dang'nim and more . The game can enjoy various jobs , and even play together ! Want to know more about the addictive game ? Read the continuation coverage !

Dragon Nest There are five professions - Warrior, iris, witch, academic and priest, every profession is different from the other. Some professions are designed to attack, some support, and some of Tanka (absorbing blows from monsters) and together, they can do almost anything. Each subject is divided into two jobs seconds, and every second job is divided into two trios jobs. Usually, two works of seconds of each profession different from each other. Taking the profession Priest For example, it is totally supportive professionals. intended to cure. All work running on Magic Power or Physical Power. Sometimes the difference is jobs seconds, and sometimes even a third work.

Classes explanation -

First job :

Warrior :

class single player can make a quick dash skill brings . Special Kombat , accompanied by a variety of pulse magical space constant high talent offensively battle . They hold a sword of two hands , and can use swords , Ftisimogrznim .

Archer :

Class further attack . Special remote attack and magic , uses long and short arc .

Mage :

Mage Class type uses magic using heavy damage . It has the ability to use fire , ice , poison and magic that compels the beginning . Uses a cane as a weapon in their book , puppet provide the type of attack .

2nd job (Level 15!) -

fighter

Sword Master:

use speed , agility and attack from afar gather strong attacks in battles .

Mercenary : high protection and slow , but powerful attacks . They use howl or cry battles the party makes any users or weaken enemies .

Archer :

Master bow :

focuses on determining length deadly attacks choice .

Tumbler : Archer ongoing electricity coming assault kicker fast , agile , fast attack Shock attack , fighting and assault .

Mage:

Element Lord:

mostly uses elements of fire and ice from cracking down heavily on the attack monsters groups.

User Bending uses energy and dark magic circle Salzmänn changing forms that attracts enemies, explode or shoot energy. Controls the elements of time and space Blhktin time for magic or to help enemies.

Cleric :

Faldin:

doing special magical defenses and protection and makes it tank. Attack weak but strong surviving. His movement also has offensive talent.

Priest: Claas it benefits diversity can for individual talent but lack other classics equaled it worthwhile. They are talented offensive or defensive enlargement of the party, invite supporters to attack Sarid, to relax, to noses or stun monsters,

Personal feedback (Brusk) -

I think the game really fun but pretty repetitive ..

I really liked the design of the game and the characters , I think that was one game Dragon Nest as one of the only open world he was mad ~

I loved the fighting and Libya skills .. in general I prefer games H & S ..

I like your character is part of the plot and see your video player itself , it really adds to the experience of the game

And makes you feel you are part of it .. Although most of the time you do not really read what God NPC's say like that .. You try to tell yourself by bringing quests and cutscenes you ..

Classes & Jobs Information -

Warrior

player is battling with a large sword two hands each player with solid attack and a good defense , some Mhsiklim (Skills) His

Bufs (Bufs) who help him in the war of Mhbafim who are good at PvP is called the Frenzy Stance is a higher level

The attack , accuracy and protection .

Good player PvP those who know how to improve his Talence (Talens) .

The race is Elf and Human only

Assassin :

Assassin mainly specializes in two small skins not like the rest of the games assassin is considered poor at the opposite here

The assassin is among the best players in the game with the skill of a long life download , specializes mainly in skills downloading things

The other player a good player , but I do not know is good for PvP .

Human race is the only and Kinderd

Mage :

User witchcraft against an enemy holding a magic wand , his standard of living is relatively small but its MP level is very high , a good player of AOE

That means it can attack some players come once at the beginning of the game is a little bored you to play with but with time

See that he gets a good player and fun game PVP one -on-one does not look good but he's my brother with it in Clan Wars then you will kill ALOT.

Priest :

An assistant , is it brings everyone's life is actually in the game Healer weak player in every game

But really helps the other players , no effort of his clan had one . Worse PvP , using thin cross in his hand as a weapon .

The race is Human and Elf only .

Bard :

Player , a poet of the game how you want to call is also an assistant brings words but also fights , except that he also can

Bring life to the group is also able to raise their level of attack , defense , etc. accuracy . . .

A good player to Pve but to Pvp not good that the low level of his life , DA using the harp as an instrument to attack .

Elf is the only race .

Dwarfs :

Players are dwarves use weapons to kill their enemies in a very fun player (for me at least) get

Bonuses and special skills that other players receive at the beginning of the game the Af of special pills , pellets " gold " downloading

Once more life and used every skill you get the ball you use it with skill bonuses you get with him .

Good PvP and PvE (depending against whom he fought and some range) and CW clear he kills them all a good distance XD .

Dwarfs are the only race .

Stoneman :

Tanker 's a really good player game with a very high Défense average standard of living can only play as a boy , using a hammer like this

Stone has a full skill of Stkaim (Stucks) just arrest you and bring you move it a huge bonus for those he fought with

Near term difficult to manslaughter because of his level of Defense and because of the skills of

Hstakim .

Most of the children were dimmed with him just because one thing that minus him but he has Buffs who arrange it later in the game (at higher levels)

It goes very slowly from the other players , but those who come to invest and come with him to cheat and play in PVP ensures you had a lot of fun with him .

The race is only StoneMan .

Vampire :

The vampire is the Kinderd race really popular player game you will see that the amount of players playing with him , a player with

Beautiful skills and hurting hold you admire the strength that this player at all levels and especially at elevations just Actor

His amazing life tired of playing with one of the strongest players in the game player with many games and good for all kinds of battles that means

Good for PvP, Pve, CW everything . Using a large cross which is always on his back as his weapon

Heroes Of Newerth

Spoiler ([Click to View](#))

[img]http://mygaming.co.za/news/wp-content/uploads/2012/02/Heroes-of-Newerth-HoN-header.jpg[/img]

Hero of Newerth or short HoN It's a MOBA based on the mode of Warcraft III called DOTA , today we are familiar with games based on DOTA like LOL and some games that were created are similar , I personally play HON and enjoy , the game is free , once he came Money Now is free , and maybe a little hard to adjust to , but once you know the game play fun and tired of all , everything is faster than LOL that's what makes it more challenging and difficult , but if you are good - you're just having

fun, then it's worth playing .

An example of type hero is the Supporter , they mainly use their abilities and skills to help the team , it does not mean you turn around and do Heal the game , it's not the style , even Supporter can get kills , but as the game progresses , so the role of the Carry entered more , and if the carry does not receive enough money and killing so he could not carry the team , anyway you apply of the Supporter is usually done Dmg ' erupts , and control the environment in crowd control - as long as the role of the Supporter is the scatter Wards map , to make it more term vision that It is important in this game

Shop

Almost everything in the store can get money in the game

More needs to be addressed in this store , the store you buy new heroes , avatars (the hero of a new look .) . And many more things , I will explain now what you can get at the store

(1.). Heroes - you start with a certain amount of Heroes , you can buy more at the store for real money or money of the game , there are heroes and some really expensive less so you can start more easily

(2) . Avatars - like skins in LOL , only here there Aootrs really change the look and sound the attacks of the hero

(3). Annouchers - when you kill and kill some sequence / someone attacks or something happens in the game of course hear it and Annouchers announcing this store you can buy various types of Annouchers be funny or annoying the opponent, for example has a British Annoucher

(4). Taunts - teasing, before you kill / plan to kill the enemy you can tease him and then when you kill him you will get Smackdown, all 10 Smakdons will get silver coin, you can upgrade the effect of the smackdown something far more cool, like a crying baby or blood burglary and of course you'll hear the hero himself teasing, if you do Taunt which is provoking him kill you, so feel humiliation and Annoucher will inform about it, you will be registered as a humiliation too Stat

(5) . Symbols and icons - you can put icons , the flag of the country and all kinds of icons , or even things that you prepare them at your own nickname

(6) . Colored name - you can change the color of your name and shield , will appear next to your name protector , has silver , blue , purple and gold , some of your shield the grade more luxurious color , so you appear more up chat

(7) . Options - things like reset the stats and tokens that will allow you to play different gamemodes Apart from all pick , renaming and more ...

Kingdoms of Amalur Reckoning

THE GAME COST 19.99\$ ON STEAM !

Spoiler ([Click to View](#))

[img]http://cdn.akamai.steamstatic.com/steam/apps/102500/header.jpg?t=1447355189[/img]

The game takes place in a world where the fate foretold . There are in elves, dwarves and humans . You open world that determine the plot and what will happen , you can choose between good and evil and what to say to the NPC . The story begins when the main character that you create the look and make her dead , but the end is always a new beginning . The main character returns to life under mysterious circumstances , she wakes up the pile of bodies , thus breaking the thread of fate set in advance . From that time , the main character becomes render fate . The main character 's actions could determine the fate of other people (NPC) and of itself .

The beginning of the game, you determine how your character will look like and you'll have to choose between three races: Thousands (ELF), elves and dwarfs. Later in the game, you are free to choose what your character will deal with work and you can choose between three ability trees. You can choose your destiny, fate will open all the capabilities and other bonuses. Every character you would be a major weapon, with which you are fighting mostly secondary weapon, for example archery or magic wand, and in addition - Shield. You can use beating fast but weak, and in addition, use slow powerful blows against the enemy. This is normal role-playing game with quests, raising skill levels. You can become a magician warrior and vice versa, you can achieve different effects for both types with different stats.

In the game you can create your own potions and herbs you've gathered along the way, upgrade weapons and strengthen them with stones and fix broken equipment . There are a lot of tasks in the game as long role playing regular users . When you enter a house in the village of NPC , there are boxes and objects that you can steal , but if you do get caught you get into prison . Map spread monsters that they 'll have to fight against a number of enemies or against the boss . The plot behind a task , you will get money and things are equal . You can also choose skills such as blacksmithing , alchemy and other skills that give you the possibility to create things for yourself .

The game is designed for all fans of role-playing games and action. The graphics are nice and the view of the open world views. Battle system is very fun and you can use two weapons at once. There are many different types of skills and attacks. Game you can freely explore the open world - caves and villages. You will get money for breaking boxes, opening boxes or killing monsters. With the money you get, you can buy changes, weapons, as well as Armor, which will help you during the game. Encounter in treasure chests open and sometimes locked with content objects. To open the locked cases, you'll have to pick the lock. There is a large selection of weapons, hammers, swords and more

Loong Online

Spoiler ([Click to View](#)) PVE = Player Vs Environment (I mean a player against monsters , good for the PQ to PARTY and quests specifically , some less good for PVP)

PVP = Player vs Player (Player Versus Player so to speak , is actually above average really strong , but less good for the PQ , PARTY or quests)

Graphics -

a really stunning graphics seen as the AION without exaggeration it all seems unreal see really far from trees, grass, soil, flowers all just Peaks!

Sound - excellent sound soothing music if you are fighting monsters then begins to loud music visual effects in terms suitable to the atmosphere.

Gameplay / Control - Even though the game is C & W but like most games have the option to go

with a keyboard and mouse is what relaxes me in .. just a great player control and more comfortable to go with the keyboard than with the mouse.

Skills -

not yet examined all the skills of the players but with graphics Hubs I think will be really good skill and full effects until now have nice skills and the beginning AOE skill you get one shot kills monsters that great tasks.

Figures -

The game has 12 similitude it does not really characters but bearing a character has weapons work and other work that secondary basically you can be a warrior and a healer or magician simultaneously or mage and warrior and healer.

Classes explain -

Bow \ Sword

PVE:

1Skill 3Str

PVP:

3Skill 1Str

Or a course Full Str (stronger but more expensive).

Bow \ Saber

PVE:

3Str 1Agi (no, not that bad Aggie to Main BOW and cyber that are slow!)

PVP:

3Skill 1Str \ Full Str

Saber \ Sword

PVE:

3Str 1Skill

PVE:

Full Str \ Full Skill

Ying \ Zathre

PVE:

Qi 1 3 Psy

PVP:

Full Psy

Sword \ Pole

PVP:

3Str 1Skill

(Thanks to To1me3r0)

So this is good, the most common of these classical ..

I Saber \ Bow with 1Skill 3Str.

But if possible, I will turn to Saber \ Bow with Full Skill! (Expensive but really loud!)

Silkroad Online - Private Servers

Spoiler ([Click to View](#))

Why private servers ? - The official game started to be too much pay2win based... without 2000\$ starting money you cannot be strong enough on guild wars / pvp , also the official game has delays while playing and bad community people , so i dont recommend to play on the official game.

To find the best private server - <http://www.xtremetop100.com/silkroad-online>

So , silkroad online... OLD game that based on arabian / chinese places...

like - constantinople , baghdad , Jangan (some chinese town) , alexandria , arabian coast , deserts and more.

This game one of the best i ever play , i started to play on 2008 and after alot of quits im still getting back to this game over and over again .

On this game there isn't much to do , expect leveling and PVP (the pvp is fun) .. There is 2 races on this game with 2 difference classes .

European / Chinese .

Some differences -

European -

1. Have 20 sec's cooldown when using a regular potion
2. Can take 2 builds (like Warrior + rouge , Warrior + cleric and more)
3. 5sec's cooldown on mixed potion (25% HP / 25% MP regen)
4. Have the most strong classes
5. Very hard to play (you need to learn 2 classes combos to survive).
6. Expensive race

Chinese -

1. No cooldown on regular pots
2. 5sec's cooldown on mixed potion (25%/15%HP/MP regen)
3. Not good at PVE
4. Can take only 1 class with addontial magic power.
(Ice / Lighthing / Fire.)
5. Good at PVP.
6. Easy to play
7. Cheap race.

Pay2Win Rate -

Well , as i told you , the Pay2Win rate its like 600% ... you buy your gear , you buy your ingame points , you buy your ingame currency and you buy BOTS to level up (beacuse this game isn't quest based).

So , please .. play on private servers , there is alot of private servers with like 4000 - 6000 people online , oldschool servers / Nowdays servers .

Gear Upgrade -

On any private server there is an another successing rate, also in any private server there is another max plus that you can upgrade your weapon.

But since you gonna play on HQ active server , the max plus gonna be atleast 10-12 , Its not easy to Plus , like from 1 to 5 its can be hard , and can be easy pref on the rates , but the most expert ones starting from +8+++ in any server that based on old school.

In Silkroad online there is 3 types of rare weapons -

Seal Of Star - Tier 3 , easy to get not too rare.

Seal Of Moon - Same more than easy to get , not too rare.

Seal Of Sun - HARD to get , NOT easy to get , and like 0.05% of drop rate on the official game.

Classes -

Weapons (EUROPAN) -

Bowman - Using Daggers + bow (on pvp you gonna use both of them).

Warriaor - Axe , One Handed sword , Two Handed Sword , Shield (you gonna use them all to get your combo great).

Cleric - Simple cleric rod

Wizard - Staff

Warlock - Dark Staff

Bard - Bard.

Classes reviews (from my experience) - EUROPAN

Bowman - Bowman its an hard class beacuse you need to use 2 weapons and you need to have

BEST timing , for this you need to practice alot, but daggers its one of the strongest class in the game.

Warrior - Strong class , alot of stuns , great buffer for PVE parties and great for PVP (alot of damage , stuns).

Bard - Class for PVE , raising your magic attack , defense , speed and more , mostly buffer class.

Cleric - Simple.. healing , reviving.

Warlock - Cursing you , stealing your hp , can debuff you with 10+ debuffs.

Wizard - The most strong magic attack power class in the game .

Chinese classes reviews -

Glaive - the most strongest class on the chinese scene , easy to learn and play, good for PVE and solo PVE.

Blader - really bad for PVE , and good for PVP , can survive alot and making damage and also blocking beacuse his shield.

Archer - OK class , good for PVE , solo PVE .. Good also on PVP , you just need a good gear .

(when you pick a chinese class , you will get an option to have more addontial power ICE / FIRE / Lighthing / Force.

Lighthing - Good for INT (magic) characters.

Fire - Good for INT , but use it with your phy attack character.

Ice - worthless , use it when you are phy attack .

Force - Can revive , heal.

How can chinese can be INT (magic)?

Its called 'NUKER' , here is a small guide about nuker -

What is nuker -

I think the best way to describe a nuker is a magical based character that uses magical attacks called nukes. This guide will not cover the many hybrid variations, but only the pure int build variations that remain after the 90cap update.

Why should i open a nuker -

Well it's the Chinese build that does the most dmg, levels the fastest and is the most diverse of all the build. You'll get to use the most skills and the only thing that stands across it is that you have less hp.. but we'll have some skills against that. And another downside is that you'll need a lot of sp.. so you'll have to do some farming. Also this is not covered in this guide. Just look at one of the many other guides about that subject. (which will be put up by me if they turned out missing)

Building a NUKER -

Remember this is a pure int guide! So first of put ALL your points in INT don't get str not even 1.. "but I want more hp.. but what if...." NO! don't do it!! If you want a hybrid or more hp go read a hybrid int guide.. this is for pure cause imo pures rule and own.... and hybrids well let's just say that's a different story. So STR bad, INT good.. remember that

Types of nukers -

Ok first of ofcourse, you have the spear nuker which deals the most dmg and then second you have the s/s nuker which deals a bit less dmg but on the other hand your shield gives you a lot of extra defense.

I'm gonna describe the ideal builds for both of them.

S/S = Sword + shield (like blader).

Restores MP in a row after that animate you . Brings you 100 % of the MP , every two hours you can run it with I'm not mistaken .

Classes guides (From my experience)

Some classes may be missed but i'm making a guide about the class that i really play expect telling you bullshit

So what can we learn from this picture?

Hit Points (HP) - basically how many lives you have , the Warrior leads here necklace with 903 HP began , while Frist least with 527 .

Mana Points (MP) - with some mana you begin , Priest leads with 250 MANA started , and Archer with a least 50 .

Damage - How much damage do you do with all the skill , this stat is important because it determines the bottom line is how much the maximum damage you do , as you see

The Archer leads with 81 points of his skills so I actually have the potential to most damage , Priest and Mystic least a 32 , so they Will do the least damage ..

Defense - how much protection you have , that some of them actually resist the damage that you receive from monsters and other players , Lancer leads with 29 and even

The main reason for it is in the tank , the least Sorcerer 12 so he actually gets the most damage from monsters and other players .

Movement speed - what speed of the player , it is very important , for example middle of a battle so you can escape by beating faster and easier , the fastest

It's the Warrior 120 , most of this slow the Lancer and Berserker 105 .

Critical Hit - basically what your chance to crit with skill (which is actually hit 2x damage) , so that's higher than you would be so critical blows ,

Highest Berzerker and Slayer with 75 , the most low- Priest and Mystic with 20 each .

Range - What 's the maximum distance attack your skills , for example Sorcerer and Archer have attacks that can reach up to 15 meters of them ,

Warrior for example can reach as far as the skill to 2 meters away .

Attack Speed - basically what the delay between Mecca Mecca , as it is lower so you actually can attack more quickly , the warrior leader here with 0.4 seconds ,

Most of these slow and the Sorcerer 's and Berzerker with 0.7 .

Attack Type - here comes the basic blow and how it affects all foreign classical and what Warrior Slayer hurt just ahead , while they also damage around them .

According to stats like that actually more than you can tell pretty much how will each Class , so why fix it briefly :

Protection : HP + Defense

Attack : Critical Hit Damage +

PvE :

PvP :

Warrior-

Defence : very high , plus it has defensive skills such as block and jump sideways (Evade) so that you avoid the blows against you .

Attack : Medium , skills do not hurt much stronger and there is no critical , but very, very quick attack .

PvE : I can play as a DPS or Tank , has a very strong Debuff against Bams .

PvP : Very good , a lot of skill to control and can dodge enemies .

Sorcerer-

Defence : very low , but it has some skills that he can avoid damaging only need good timing to use them .

Attack : high , high damage but low critical , yet the fact that he enjoyed very remote attacker so he can focus on skills .

PvE : DPS is excellent and sought after throughout the Party , solo PvE must be careful not to get hurt too many monsters .

PvP : excellent , lots of skill robust control , and remote attacker can easily kill enemies unprepared.

Slayer-

Protection : medium , one skill he has run away from enemies , helped a lot in his Stuns also prevent damage .

Forwards: very high , high damage and Create very high speed clouds and highly offensive .

PvE : DPS also excellent , also considered relatively easy because most of his skills connected together combo .

PvP : Medium or higher , is not it hits hard and has some good skills against other players , but it is very vulnerable to attack by others .

Priest + Mystic-

Protection : low , low HP and armor , but we must not overlook the fact that they are healers and can even heal themselves and that really helps them stay alive .

Attack : low , do not expect them to be DPS .

PvE : healers every sense of the word , that's what 'll be expected of you as well .

PvP : ditto

Lancer-

Defence : very high , high HP and armor , a lot of skill protection and resistance to damage .

Attack : medium , can do quite a bit of damage .

PvE : The main tank of the game and what it remains .

PvP : excellent , high defense and some very strong skills to take control of enemies .

Berserker-

Protection : High , Block could have very damaging to defend and later in the game too evasive skill .

Forwards: very high , high , and a lot of damage to critical , very powerful skills with low cooldown .

PvE : considered to many as the best DPS in skilled hands , can land a lot of damage to enemies .

PvP : weak - medium , very slow and relies on the skill of charge to damage , often need help from

others to take control of enemies and blows .

Archer-

Protection : medium , they have some skill to evade damage .

Attack : medium - high , while the highest damage to their game , their critical real low and it is very offensive capabilities of their damage .

PvE : Claas very simple to DPS , is considered to many as a very classy and easy .

PvP : Very good , can keep away his enemies lay traps , a lot of skill to control powerful enemies .

PvP : High , if you know how to play reaper , so you will have no problem at pvp , reaper have the best skills for PVP but you just need to hit them all on your target and then you can just kill your target in one successful combo.

I will recommend !

The Secret World

Spoiler ([Click to View](#))

What if all things super - natural habitat heard about them really exist ? Zombies , werewolves , vampires , etc.

The atmosphere is like in the books / movies tension and fear and influenced by them , for example a street game called " Elm Street " (yes it 's a street known killer Freddy Krueger) .

For those who played the game ALAN WAKE atmosphere here is very reminiscent of the game only language you do not go only with a flashlight .

The game can indicate that voters favor a particular profession early in the game but simply by gaining skills favorite weapons and no small selection:

Guns, guns, fists, fry, swords, Alnm as well as weapons such as rifles Rank 6 missiles, and another one dedicated lovers of Magic (now longer going to add more)

Just get the desired skills then creating a child by each accredited professionals only language can be changed at any given moment, you feel like to be healers?

By creating Hiller's child, you suddenly come to a tank? Get skills and weapons of the tank and always will change depending on the game or the team with which you play.

About levels:

Each "level" you get a number of skill points, a point for weapons and equipment, and also about 16 Rankim same company you have chosen to play.

The game is B2P (as Guildwars) which means to buy the game and get all the content , an option in my opinion is better than other business models .

Also every month or two now takes DLC adds more missions / weapons / skills play a small fee of \$ 20 million (an example of the first DLC released)

* Of course, the company also continues to events and things in the game regardless of the DLC and those who want to buy do not have - there's enough content without packages .

Battle system :

Thanks to this you can choose from hundreds of skills , weapons selection and creation of children here more Mgoobnt system and Mancini create interesting combos .

Graphics :

Graphics of the game is very impressive in the MMORPG and has improved since the start of the game .

Atmosphere :

The atmosphere is modern and dark as the rest of the games are influenced by Tolkien fantasy atmosphere (of course, the better)

If you desire to try to play a different atmosphere invested , it certainly was anointed

Tera Online addontial classes information -

Spoiler ([Click to View](#))Ninja-

Protection : Medium / low ,Ninja protection isn't that good because he is a DPS class , ofc he have evade skills and huge damage and combos but as i pvp alot , ninjas are easy to kill , its about who play them.

Attack : High , ninjas is one of the best DPS class on tera , ninja has strong combos and skills and by upgrading your weapon you can have HUGE dps.

PvE : Good/low , ninja isn't the best pve class the i ever played , leveling is kind of hard with him but worth when you're 65, also by pvei'ng you learn the class more and more , so worth to pve and its kind of good to pve too , ninja have some clear skills so he can kill multiple monsters.

PvP : High , ninja is a good class for PVP , you have the best skills for pvp , you have the best combos for pvp and you have high damage on pvp .

Ninja its a strong class for PVP and recommended for pvp.

Brawler-

Protection - High/medium , Brawlers have their defense ability by right clicking , This ability looks like and working like kung fu master in blade and soul , that you reflect some damage while blocking an monster ability.

So protection of brawler its pretty high if you have a good timing and a brain to know when to cast the ability.

Attack : High , Brawler have the best skills for attack , the best combos (also one of the strongest combos) and he have HUGE damage and low cooldowns.

Cant say much just amazing.

PvE : High/medium , Brawler have a good grinding pve but he is not good for bosses , for PVE he is wonderful , example , he have a skill which he runs and collectiong monsters while he running and then when you click space you have "ground smash" skill which kill them all , amazing for pve.

PvP : High , brawler is a good PVP class but you need skill to win the PVP , you need to know when to block when to stun and which ability to launch when you have the chance , brawler have ton of damage on pvp if you're good combo maker.

Gunner-

Protection : medium/low , gunner dont have much evade skills and he dont have any blocking skills but he is ranged attacker so thats why i gave him the medium rate.

Attack : What can we say? class with a huge gun , ranged attacker and huge dps , just perfect and easy to control , gunner have a wonderful skills and useful skills to attack and also have a LOT of dps.

PvE : Medium / High , Gunner is attacking slowly but his grinding pve is the best since he can kill ton of monsters by one combo and huge dps , also gunner skills are awesome for PvE and best for farming mobs , i will recommend.

PvP : Low/half-medium , gunner attacking really slow and his defense is not high , ofcourse he have a lot of DPS but you're attacking slowly and each skill has his seconds cast , i will not recommend to use gunner for PVP because its really bad in my opinion and not really fun to get killed and stuned while you casting a skill.

Reaper-

Protection - Low , Reaper is class that you will use only for PVE , PVP , his damage is HUGE can be millions and attack speed and skills are designed for PVP and PVE which is AWESOME.

Attack : Very high , Reaper have one of the best skills and damage in tera , he have very fast attack speed and he have low cooldowns and POWERFUL skills which make him for me #1 in tera attacking classes.

PvE : High , As i say , reaper have one of the best skills and damage to grind pve and to farm bosses , he have ton of damage and each skill making multiple damage lines , just upgrade your weapon and wallah , you are MONSTER.

[*]Thats it guys , I hope you like this thread, I know there is some letters missing but if they're missing so its says that i never play a game starting on this letter and i cant tell you information and write a guide for it which cant be good for this thread.

[*]In some games as you can see i didn't write alot of information since i didn't play this games enough to make a deep explain for you.

[*]If you have any question about another game that i didn't put on this thread , feel free to ask me since i played about 60+ mmorpg games .

[*]If you want to see another game tutorial you can PM me with the game name and i'll do the tutorial for you.

[*]Took me 2days to work on it , So as you can see the mmorpg section have some fresh games that not alot of people talk about them here.

[*]As you can see i added a video from A-Z to provide you a better information and an actual gameplay of the game expect reading and then play

[*]All this games still exist , non of them are closed / betas , all the games are released and can be played at this days.

[*]If you want to play with me any game , feel free to ask me and we can start on building something , just be sure you're serious about this.

That's it , i hope you like it and if something is missing let me know i'll fix it instantly .

Hello.v4.0 - September 16, 2016, 7:20 am

Was bored, so typed this up for FFXIV.

Spoiler [\(Click to View\)](#)
-image goes here-

Final Fantasy XIV A Realm Reborn is the relaunch of Final Fantasy XIV, and takes place right after the calamity that takes place at the end of the original game (1.0). It has datacenters for NA, EU, and Asia regions. Costs \$13 a month for the entry subscription.

Races

While race can impact starting stats, it's not as important as, say, Everquest or Final Fantasy XI. You're free to pick whichever race you want as the stat difference is fairly negligible.

Au Ra - Dragon-esque race with horns, scales, and a tail. Heavensward only.

Elezen - Elf race that is fairly tall and slender.

Hyur - Human race.

Lalafell - Tiny race that resembles a child. Objectively the best race.

Miqo'te - Cat race.

Roegadyn - Huge race, perfect for Incredible Hulk cosplay.

Classes

Classes can be obtained by talking to guildmasters around the 3 major cities; Gridania, Limsa Lominsa, and Ul'Dah. The current classes are:

Arcanist (ACN) - DPS role that also uses a pet for more damage. Branches into Summoner (DPS) and Scholar (Healer).

Archer (ARC) - DPS role that is fairly weak in comparison to the others, but has the advantage of being able to stay at a distance. Branches into Bard.

Conjurer (CNJ) - Healer role, has the strongest heals in the game. Branches into White Mage.

Gladiator (GLD) - Tank role, the weakest of the three, but also the easiest as well as having the most defensive capabilities. Branches into Paladin.

Lancer (LNC) - DPS role, one of the strongest and relies on positionals and keeping buffs up. Branches into Dragoon.

Marauder (MRD) - Tank role, the strongest of the three, but has the least defensive cooldowns. Branches into Warrior.

Pugilist (PGL) - DPS role, one of the strongest and relies strongly on positionals and keeping buffs/stacks up. Branches into Monk.

Rogue (ROG) - DPS role, decently strong and has great utility at later levels. Branches into Ninja.

Thaumaturge (THM) - DPS role, very strong AoE damage, spell-based. Branches into Black Mage.

Jobs

Once you hit level 30 in a primary class and 15 in a secondary class (with the exception of Heavensward jobs) you are able to take up a job and gain job-specific abilities and traits.

Summoner (SMN) - Pet-based, takes all the skills from Arcanist while also having its own job abilities. Great AoE damage. (30 Arcanist, 15 Thaumaturge)

Scholar (SCH) - Pet-based, takes all the skills from Arcanist while also having its own job abilities. While it has weaker heals than the other 2 healers, it is great at damage mitigation. (30 Arcanist, 15 Conjurer)

Bard (BRD) - Ranged DPS that supports the party with songs, takes all skills from Archer while also having its own job abilities. While comparatively weak to most DPS, they are invaluable in a raid setting due to their utility. (30 Archer, 15 Pugilist)

White Mage (WHM) - Strongest heals in the game, takes all skills from Conjurer while also having its own job abilities. Great for inexperienced healers or for healing through strong damage. (30 Conjurer, 15 Arcanist)

Paladin (PLD) - Best traditional tank in the game, takes all skills from Gladiator while also having its own job abilities. Considered the easiest, it's great for inexperienced tanks but also amazingly self-sufficient and good at damage mitigation. (30 Gladiator, 15 Marauder)

Dragoon (DRG) - Currently tied for the highest DPS in the game, takes all skills from Lancer while having its own job abilities. One of the easier DPS jobs, but can output tons of damage. (30 Lancer, 15 Pugilist)

Warrior (WAR) - Hardest hitting tank, basically a glorified DPS, takes all skills from Marauder while also having its own job abilities. This is the go to off tank because of the damage debuff and slash debuff. (30 Marauder, 15 Gladiator)

Monk (MNK) - Currently tied for the highest DPS in the game, takes all skills from Pugilist while having its own job abilities. Considered one of the harder DPS classes, it's all about keeping Greased Lightning stacks up, your DoTs up, and your buffs/debuffs up. (30 Pugilist, 15 Archer)

Ninja (NIN) - DPS with a ton of utility, takes all skills from Rogue while having its own job abilities. Does decent damage while also being able to help out the rest of the party. (30 Rogue, 15 Pugilist)

Black Mage (BLM) - DPS that specializes in AoE damage, also very strong on single targets and has unlimited MP if managed properly. Takes all skills from Thaumaturge while having its own job abilities. Every group will want at least one of these in their party for DPS checks. (30 Thaumaturge, 15 Arcanist)

Machinist (MCH) - DPS with a ton of utility fairly similar to a Bard, being a Heavensward job it requires no base class, just getting through the base game's main story.

Dark Knight (DRK) - Tank with fantastic magical damage mitigation and also does fairly decent

damage, basically a mix between Paladin and Warrior. Being a Heavensward job it requires no base class.

Astrologian (AST) - Healer that can switch between different "sects" to either shield or regenerate health. Being a Heavensward job it requires no base class.

Final Fantasy XIV A Realm Reborn is the relaunch of Final Fantasy XIV, and takes place right after the calamity that takes place at the end of the original game (1.0). It has datacenters for NA, EU, and Asia regions. Costs \$13 a month for the entry subscription.

Races

While race can impact starting stats, it's not as important as, say, Everquest or Final Fantasy XI. You're free to pick whichever race you want as the stat difference is fairly negligible.

Au Ra - Dragon-esque race with horns, scales, and a tail. Heavensward only.

Elezen - Elf race that is fairly tall and slender.

Hyur - Human race.

Lalafell - Tiny race that resembles a child. Objectively the best race.

Miqo'te - Cat race.

Roegadyn - Huge race, perfect for Incredible Hulk cosplay.

Classes

Classes can be obtained by talking to guildmasters around the 3 major cities; Gridania, Limsa Lominsa, and Ul'Dah. The current classes are:

Arcanist (ACN) - DPS role that also uses a pet for more damage. Branches into Summoner (DPS) and Scholar (Healer).

Archer (ARC) - DPS role that is fairly weak in comparison to the others, but has the advantage of being able to stay at a distance. Branches into Bard.

Conjurer (CNJ) - Healer role, has the strongest heals in the game. Branches into White Mage.

Gladiator (GLD) - Tank role, the weakest of the three, but also the easiest as well as having the most defensive capabilities. Branches into Paladin.

Lancer (LNC) - DPS role, one of the strongest and relies on positionals and keeping buffs up. Branches into Dragoon.

Marauder (MRD) - Tank role, the strongest of the three, but has the least defensive cooldowns. Branches into Warrior.

Pugilist (PGL) - DPS role, one of the strongest and relies strongly on positionals and keeping buffs/stacks up. Branches into Monk.

Rogue (ROG) - DPS role, decently strong and has great utility at later levels. Branches into Ninja.

Thaumaturge (THM) - DPS role, very strong AoE damage, spell-based. Branches into Black Mage.

I went in really hard on launch but stopped playing after they added the field bosses because the hardcore element was gone for me, only been downhill from there with the option to "p2w" now to.

It's an alright game but the devs are the usual fat slimy snakes you are used to find in games like this, you might have some fun with it still tho with a guild/friends.

Lovely thread by the way op and congrats on sticky!

MMO games are pretty fun, you build something then you upgrade your character, joining a guild and starting wars and fun.

Those type of games that i really liked until now (tons of years).

You can still play it. Ephinea has the same XP rates as the original game and is somewhat new. Ultima has 3x/2x and is the oldest server currently alive. SCHTHACK is pretty dead, but used to be the most populated of the bunch. Died due to a database wipe IIRC, so I wouldn't recommend it.

Path of Exile The Forbidden Sanctum has been out for almost a month now. In this month, I basically put most of my time on experiencing Ruthless. After such a long time of experience, I naturally have some personal opinions on some aspects of this new hard mode.

General Thoughts About Gear Progression

The first is about gear progression. Since I'm playing an armor character, I've probably spent a bit longer in white gear than most other characters in Ruthless. To my surprise, it really wasn't bad at all. Dropping a good armor base is exciting in itself. As I progressed to the point where I had conversions for using the good ones, I saw the bases get more rushed. Overall, the gear progression feels really, really good, and I'm amazed at how it makes me feel.

In the base game, I basically just ignore the gear in the campaign. All I look for is links, throw an alch at it, and then we are rolling. I've completed the campaign several times, only to realize I was still wearing the Act 1 gear when I finished the Act 10 kitava. It's not an option at all. Gear progression is important, thus adding a dimension of activity that barely existed in my base game. Rare items are very few until I get into the later stages of the campaign. I start using a gold flask around Act 8, hitting it when I want to kill rare, magic and unique enemies. This seems to give me a significant boost on rare items. In the base game, I can't always tell if rarity makes a difference, but it seems obvious in Ruthless. Maybe rarity needs to be nerfed? RNG is RNG of course, so I admit that the gold flask may not be as important as I thought.

General Thoughts About Decision Making

In the early days of a Ruthless character, you will soon be faced with many important decisions. Every Skill Gem you choose counts. In hindsight, I probably shouldn't have used those two Skill Gem rewards on the war cries for Earth Shatter. Each of these gems could be a different gem useful for the current iteration of my character. Also, these options will be more general rather than specialized, and they'll be good for any melee skill, such as blood rage, enduring cry, vitality, etc. My progress in Act 2 and Act 3 may be a bit slower due to using a skill with less AoE than Earth Shatter, but the overall progression of the campaign will probably always be smoother. I think blood rage and enduring cry in particular might be a bit too strong to be quest rewards so early on.

Now, while there are many important decisions about quest rewards in the early game, this theme doesn't really carry over after Act 3. Please consider finding ways to provide these meaningful choices throughout the campaign. It's a whole new dimension that doesn't exist in the base version at all, and it feels so good to have these options.

I think it would help the Ruthless mode a lot if there were more quests with gem rewards. You can move some of the OP Act 1 to Act 3 skills to later in the game, such as Act 5 to Act 10. This will also leave room to add more early game skill options to each character. For example, you could move the Act 1 Brutus rewards to the Act 6 Brutus and Shavronne fight. Then, for the Burtus reward for Act 1, you can add combat skills that apply to the character you're playing but aren't available elsewhere. I think this would add more variety and give the Ruthless a better game experience while sticking to the extra layer of decision making.

In general, Ruthless is more suitable for players who like hardcore challenges to try. Since the drop rate of items in this mode is extremely low, the best way to improve your own strength is to buy POE Currency at poecurrency.com to obtain some excellent equipment and weapons in advance.

very true, and tbh 2018 doesn't even feel that long ago for me, the pandemic made time go by real slow.
