Thread: [\[TUTORIAL\] Quick, easy and effective RAT spreading](#)

AC5L4T3R - September 8, 2016, 6:04 am

Hope this is the right place to post.

Anyway, this method is pretty simple and should work. Once I get my LL working properly I can start trying it myself but it was something I thought of and maybe you guys could use it to.

1. Make a fake FB profile and use some E-Whore picture packs from the other part of HF.
2. Join a "singles" group, the more people the better. I've been a memeber of one for two weeks now and all I see is desperate slimes who are falling even the most obviously fake accounts.
3. Post some pictures in the group and watch the friends requests flood in. Get chatting to some losers and tell them you have more pictures for them to oggle at.
4. Now, get some pictures and save/convert them to .EXR using Photoshop or something. Download the program "IrfanView" - a free image viewing program that will open .EXR files.
5. Create your stub, crypt it and bind it to the IrfanView.exe. Create a zip/rar file with the .exe and the .exr files and send it to your target. Simply tell them they have to install IrfanView to open your photos because they wont in windows viewer. They will, however, show up in explorer as a thumbnail thus showing the target they are real images. You can just tell them you included the program for ease of use.

Good luck and let me know how it goes!

Within 10 minutes of posting the pictures I took from one of the free packs, I had almost 100 friend requests and tonnes of messages off also sorts of guys. Managed to make £30 which isn't bad.

Black Kodak - September 8, 2016, 11:50 am

Thanks for the method op, I've thought of this before too.

Pretty nice idea though for anyone who is new to ratting / wants to get some easy slaves.

No problemo. I've managed to get LL working now, could you point me in the direction to a good binder? I've amassed a huge amount of targets to try this on since I made this post. So many thirsty guys!
