Whats Included

- 3 Methods to jack twitters
- Completely unrelated to previous twitter methods I sold

Review Copies Available: 2/2

Note*: One of these methods can be twisted up and used to unban handles as well.

Payment Methods Accepted: BTC and Paypal

My honest review,

OP's method has 3 Working MMethods, out of which one is public but yet, another 2 are not and is very much likely to work on 80% of the accounts, if second method is done correctly, you can get the rest 20% easily. Seriously! But the second method is limited because the more the product gets sold the more it will be less likely to work - the second method.

I will not go much into details on the third method but, here you go,

1st method works, but only on suspended or inactive accounts and you need a Verified Account for that.

2nd method works, and is a Account Method, and if you read the second one, you will most likely find something more interesting. You can even jack out gmails and live accounts - to be sure.

Interestingly, 2 of these methods are not public but yet working. Nice done OP on your Homeworks xD

Vouch for this Guy!

If there is a vouch copy still available, I will more than happily take it and write up a full review within the hour of reading through it.

Let me know OP !

why not just open a service where you unban @'s, because you'll earn 10x than this ebook ever will.

PMed to jack me a twitter for money but got no response?

Are you only interested in selling the method?
