What you did before ? seems there's a reason for it

Privnote + skype logs = fail

Unfortunately this was offsite and will be treated as such.

Currently privnotes are the easiest way to get away with shit through PMS and skype so at this point - if someone sends you one, just don't even open it.

Also there is nothing in this entire report that shows any of it as legitimate. The privnote doesn't show you opening the URL and doesn't show the code before you click open.

The skype image you show here is taken on a PC

Spoiler ([Click to View](#))

Where as the other images are taken on a phone.

The images with the actual chat don't show his skype either, just someone on skype named "grimmy"

The methods in his fucking eBooks are "Go on craigslist -> Sell"

So you are saying I can write up a thread offering my 1 to 1 personal, private, money making coaching services and then send them a video on youtube of some trader making 50 pips?
