I used this in my free service and money dropping is being detected. Doesn't matter what you spawn.

It will be detected in a few weeks/months for sure. But it isnt detected yet. you can get banned for getting reported but the Mod menu I use is safe at the moment.

But mate those prices are too high.

Thanks ?

I will go lower with the fast dropping since its easier for me too. And maybe a bit with slow dropping. The prices are that high because its safer than recoveryys

Bet - September 11, 2016, 2:36 am

How exactly does this work? Is this doable on PS4?

ScorpionOfWar - September 11, 2016, 3:51 am

(Sep 11, 2016 02:36 AM)Tick Wrote: [\[CITE\]](#) How exactly does this work? Is this doable on PS4?

I will do this on pc and the pc Social club accouts can get used on ps4/xbox1 too.

I will create a private lobby and then I will drop you money (Slow Drop)

Or I will login to your sc account and then I drop you monney much faster and you need to do

nothing

No Bans since 3 Months so I guess its not detected. Its still safer than every recovery!

45 USD for 50 mill Ingame is a scam. The cheat u are using cost 6 dollar a week.

Killer992 - September 11, 2016, 8:24 am

Why sell this service when people can just buy GTA FORCE and drop money on themselves?

(Sep 11, 2016 08:24 AM)Killer992 Wrote: [\[CITE\]](#) Why sell this service when people can just buy GTA FORCE and drop money on themselves?

Because some people are too lazy or dont want to mod themself

I will think about the price thanks for letting me know.

#UPDATE! Lowered the Price extremely. Sorry I never sold something likes this. And dont compare my prices with Recovery Services

Thread kind of contradicts itself.

You say fast drop costs more but then in the prices it costs less.

I do money drops for \$10 bro.... Sorry OP I know it sounds crazy considering the prices of shark cards and stuff but there's way to many options out there rather than pay such high prices.

Dude really?

Get out! Advertise on other threads is the most pitiful advertisement. And if you make it with a recovery menu then the accounts will most likely get banned

Yo Scorpion what ever happened to your discord group? I left a while ago since I thought I was done forever with GTA 5 but I'm back and I can't find your group anymore, I noticed you deleted your discord account too, I was wondering what's up with that? Looks like the none of your contact links in original post work either, did you get a HWID ban and quit or something?

Also I suppose you're completely out of the GTA modding business now?
