Thread: [\[Tutorial\] DayZ Standalone .60 - SUICIDE EVERYWHERE + EVERYTIME GLITCH](#)

Darb - September 10, 2016, 3:29 am

Welcome to the suicide everywhere and everytime glitch!

This glitch came out with the version 0.60 and is still working.

Latest working proof: 0.60.133913

Okay! Let's get started.

This glitch works everywhere and everytime. It's also working as fresh spawn (bambi) without any loot. This glitch is very useful if you got broken legs, a bad spawn or nothing to shoot yourself (or nothing to jump off).

What do you need?

You need any item, like rags or other stuff which you can put in your hands. It works with any item. You can also use the red flare, when you want to get killed yourself as a fresh spawn.

How does it work?

Put any item of your choice in your hands. After that, just simply hold mouse 1 (left click), press quickly F11 (one time) and hold down G until you die. That's it!

When you did everything right, you can see the suicide animation with the item in your hand and he will suicide with that. Now you can Respawn!

Thank you very much for watching this thread!
