Thread: [Scammed \\$40 By Gamer Fusion \(aka. Endire\) | UID 3251473](#)

Hamekaze - September 10, 2016, 12:38 pm

I decided to post this ahead of schedule due to the user removing us from his group chat and messaging other users regarding a loan. I will close this if it proves false/resolved.

User Profile: <https://hackforums.net/member.php?action=profile&uid=3251473>

User contacted me over Skype at first for a \$30 BTC loan, then I request that he PMs me on HF regarding this.

Then I send a \$30 payment and he begins to remove members from his group chat.

Seems very sketchy. DWC right now.

UPDATE: Seems like the user sold his account.

I hope he pays you back OP. Pretty weird that he would scam considering he has made a bunch of donations to HF recently - check his awards.

Wouldn't consider him a good user if he sold his account, eh. It's my loss; however, I guess my only flaw here is not checking his trust scan.

someone posted saying he sold his account with proof in the community alert, looks like you wont get a refund as in the SS it says he wanted to scam/ make his money back from what he paid for the account

Yup. I'm fully aware of that.

Just gonna leave this here in case he plans on scamming more. Updating in the DB.
