Thread: [Would-be Reagan assassin John Hinckley freed after 35 years](#)

Marconi - September 10, 2016, 6:57 pm

The would-be assassin of president Ronald Reagan, John Hinckley Jr, has been freed from the mental hospital after roughly 35 years.

I still say that he can't be trusted and might try to do something stupid, again.

ruthless af god damn

Marconi - September 10, 2016, 10:03 pm

If Reagan had actually died, Hinckley would have been sentenced to death and executed long ago, regardless of whatever his mental state was.

BR?ND?N - September 10, 2016, 10:26 pm

Hopefully he doesn't screw up this time. America needs you Hinckley.

bk randy - September 10, 2016, 10:33 pm

Well shit, the dude seems like a low key psycho

Yeah, Hinckley is legitimately a clinically diagnosed psychopath.

People with his psychological profile aren't exactly known for their restraint and mental stability.

I'm guessing it's only a matter of time before he does something stupid, unless he is put under tight supervision and community control.

Also, he should be permanently restricted from ever owning a firearm.
