Thread: [Blazin Hosting - A WARNING to Potential customers.](#)

*Armada - September 10, 2016, 9:16 pm*

Firstly, lets start with the obvious.

I ALONE have 2 deal disputes this idiot refuses to even address, let alone resolve.

But, lets put ME aside, I am not that important.

Let us take a quick search on his User name:

<https://hackforums.net/search.php?action=results&sid=8b294fc536640ae4d30273c604b9ec52&sortby=lastpost&order=desc>

The Cover/Scenario:

Blazin will run what appears to be a legitimate hosting service, until he hits some kind of problem.

- ALWAYS a problem ON HIS END.

When the end user files a complaint or trouble ticket, this is when shit hits the fan.

SOMETIMES the problem will be easily resolved.

However, usually (As experienced through numerous account, to which Blazin does not have knowledge of me holding) Its the same fucking story, time and time again.

> User files a trouble ticket

>> Support takes fucking AGES to reply

>>> Eventually due to UNSATISFACTORY REPLY / RESOLUTION, customer requests a refund.

Blazin:

>> BANNED/SUSPENDED accounts on absolute bullshit.

He hides behind 1/2 reasons:User threatened me

User attempted to extort me.

Both bullshit.

Is it just me, or does no one else find it unusual this one retard seems to get threatened so much more than ANYONE ELSE on this forum? including myself, who is a complete asshole at times?

Its a simple explanation.

This is his "Safe mechanism" His fail safe that has kept this retard safe all this time on the market. While he STEALS peoples money unjustly, he is allowed to press on.

I say fuck this dickless wonder and ANY member looking for hosting to consider ANY other source other than blazin hosting.

Those affected by this members outright scam, I encourage to speak up and live to make this

voiced and heard for the new members to see.

Down with Blazin Hosting!

**Lord\_Jesus** - September 10, 2016, 9:20 pm

Oh well, glad I'm seeing this, otherwise I'd never knew it... Glad I'm using the best hosting on HF tho :)

Egregious! :)

**minimalist** - September 10, 2016, 9:22 pm

He seems to be a difficult to work cunt with a fake thug persona. I've been looking for some servers and was considering his service, but I'll steer clear of Blazin.

dont buy shit off hf u shud know that already

**m4dh4ck3r** - September 10, 2016, 9:57 pm

I've had same issues with Blazin.

I bought shared hosting to test. I uploaded my files,changed nameserver and my domain didn't come online.

I submitted a ticket and they just "moved" my hosting to another server and all my files were gone. Just like that.

It took around five days for my site to come up and then in a day or two it went down again .

It was just 5\$ so I didn't really want to contact support .

**Lord\_Jesus** - September 10, 2016, 10:03 pm

Egregious is offering the best. Unbeatable I swear.

**SIM-82498** - September 10, 2016, 10:25 pm

I've seen far too many complaints regarding Blazin to even consider doing any business with him. The thing about Hackforums is that no matter how many community alerts are put out on him, people will still purchase his services.

Until this punk refunds me for illegal stolen money for un-rendered services I have no intention of leaving this be.

Fuck Blazin and his white ghetto opinion.

Broke boi trying to make rent while ripping people the fuck off.

**J?son** - September 10, 2016, 10:59 pm

Damn, that's alot of scam reports concerning his services.

Hope you get this resolved

**W?lr??** - September 10, 2016, 11:13 pm

I honestly don't know why anyone would want HF hosting. Buy from a reputable company that pays taxes and hires professionals or use a dedicated server from somewhere reputable.

**Chicken Buff** - September 10, 2016, 11:33 pm

Or you can buy from me :P

I offer WAY better hosting and respond to tickets in a timely manner :P

**Demonstrate** - September 10, 2016, 11:34 pm

Looks legitimate, hopefully this gets resolved. Also for a second I thought that your username was Amanda.

**Cecilia** - September 11, 2016, 12:52 am

I remember the time I lost \$180 to blazin.

He 'suspended' because of 'disk' or 'cpu' usage.

None went ever above 5%.

**Tommy Chong** - September 11, 2016, 12:56 am

I can vouch for the safe mechanism

Legit alert.

**G??gl?** - September 11, 2016, 6:55 am

**Wires** - September 11, 2016, 10:23 am

What service did you purchase from him?

**Armada** - September 11, 2016, 11:00 am

(Sep 11, 2016 10:23 AM)Wires Wrote: [\[CITE\]](#) What service did you purchase from him?

I had 2x Shared hosting accounts.

One worked fine, the second one was down for 6 days from purchase, when I requested a refund due to unsatisfactory uptime he claims I threatened him and he cancelled both of my accounts (Paid in full using BTC) and has since ignored the deal disputes and refused to provide a refund for un-rendered services.

**Knucklez.** - September 11, 2016, 11:01 am

someone with that many reports open can't be trusted lmao

**Mi2414** - September 11, 2016, 7:35 pm

Sad to see another one of these up, I hope you get this resolved brother.

W?lr?? - September 11, 2016, 7:36 pm

BlazinHosting is only good for it's RDP's. I buy them all the time, and once they get changed, I just post asking for a new one and I get a new one really quick.

It's fucking hilarious how Armada is worrying about me instead of his own life. Sad. Make all the marketplace posts you want it still don't change the fact Brian Krebbs owned your stupid ass. You are a child. You didn't get refunded because you violated the tos and spammed the sales thread, (HARASSMENT) Do you understand what that is? I guess not. It's not rocket science stupid fuck. Agreed.

Also, backups! Don't find this out the hard way. Your hosting account (especially on shared) can be shut down without notice and you can lose everything. Schedule frequent backups so you can always just transfer hosts.

Found that out the hard way many years back on EIG hosting. Actually another off topic tip, stay away from hosts owned by EIG.

Sucks your account got shutdown.

RDPS can take a bit to get sent out when we are low on stock. We've since updated our support system to a much faster way with mobile alerts and other methods. Anyway, I've sent you another RDP in pm a few moments ago and won't be posting here again.

There are a lot of low quality services/products here, you know that. There are of course outliers though! I'm personally not a big fan of hosting with resellers, which there are a lot of here.
