Thread: [Scammed \\$1500 for word exploit by Bull uid=1844212](#)

Fud_bot - September 11, 2016, 9:24 am

This guy [Bull](#) contacted me on jabber that has word exploit. He gave me his profile on HF as a guarantee. I paid him and he sent the product, it was not as advertised and he has blocked me online on jabber.

The problem is that these kind of people give HF a bad name and make other forums see HF as a scam joint and skiddie forumn.

[Bull resolved another deal dispute](#) for around the same amount of money, so things aren't looking completely hopeless for you. Good luck getting this resolved.

i a m g o n e - September 11, 2016, 9:29 am

your links are fucked bro gotta fix em

Armada - September 11, 2016, 9:31 am

That is not the Jabber address I have for Bull.

@OP you may have been potentially scammed. Messaging Bull to confirm his address now.

2073436 - September 11, 2016, 9:31 am

Your image links are not working. Are you sure you dealt with the real guy and not an imposter? Good luck!

VeloCityMods - September 11, 2016, 9:32 am

INB4 you got scammed \$1500 by an imposter .

Go ahead and compare.

The GRim - September 11, 2016, 9:41 am

Is there any proof that it's Bulls Jabber.

Might have been an imposter.

You should have confirmed over PM.

You should have confirmed over PM. There is another scam report against Bull, which he resolved, where it's the same Jabber.

Bull's services are bullshit

Should have searched his UID

I see.

Then Bull will surely resolve this. He's a professional businessman.

His jabber on his thread design shows "bull@jabbim.cz" so that is definitely Bull's jabber.

I believe further confirmation is not required, this seals the deal.

It is quite possible he has a secondary address, no argument. I am just saying the Jabber I have for Bull is not the one in the screen shots.

Did he verified on HF that it was really Bull? Not that i want to defend him, but it could also be a imposter, i hope this will get resolved soon!

lol read the thread before you postwhore

It's been confirmed it's his XMPP and I've personally had bull on that XMPP for over 2 years.

This. The [Verify Secret](#) function is there to prevent this happening.

Lucky for OP tho, there's plenty of proof it's Bulls XMPP and there's no way he can say it's been jacked or w/e

Righteo.

Has always seemed like a genuine user, but it seems nobody gives a shit anymore. The fact that he's blocked you on an account that is confirmed to be his is pretty fucking sketchy.

Two sides to everything, hopefully he'll respond and it'll all be a misunderstanding resulting in you gettin ya money back.

I can see that you moved cmd.exe into the builder folder cmd.exe need locate in /windows/system32 . You have did a silly mistake while building your stub and made a scam report cause for this.

Jabbim.cz has disabled my account in last week but I am always here . You should need to contact me on HF about to get support before posting this thread . Exploit is perfectly working fine . add my on other jabber for getting the support .

Armada - September 11, 2016, 6:29 pm

@OP

I spoke with Bull regarding this, although I do have a different Jabber addy, you dealt with the right person.

Bull further send me the exact files he sent you.

I dont see the problem here?

[Check This](#)
[And This](#)

Tested and confirmed working on my own behalf.

Either you did something wrong, or something fucked up in the process, because I have the exact same package you were given and I had zero issues compiling, or executing.

I suggest closure of this thread and hope that Bull might be nice enough to sort this out with you.

Impatience is not a virtue anyone likes. (For the record) ?

It seems pretty straightforward that the issue was on you, not Bull nor his product.

Armada and him both have tested it properly, he's offered a resolution and you seem to dislike it. Close the thread, you're wasting your time.

Did you have pmed me on HF or try to reach me before you have post this shit. No You're not and I had already said that my mentioned jabber has been disabled more then week ago But I am always here to respond you or my other buyers . I dont think sending a Pm has taken much time then to make a scam report.

The jabber came on today, I added theone@xmpp.ru , gave you TM information and you still did not respond. I have sent you PM today still no response. why not post how I can reach you here so everyone can see. All of a sudden it is difficult for me to reach you in all medium, Isn't that kinda funny

Another scam by Bull... pfff... no matter how much I hate him, it seems that you OP made a mistake building the silent doc.

By the way... if you are testing the exploit on win10 or with Office 2016 it won't work... That exploit doesn't work on win 10 nor Office 2016
