Some of the languages I use:

- perl
- Common Lisp
- Scheme
- C

and others. It is often best to let me choose which languages to use.

Private messages are preferred to skype. Always send me a PM first, so I can associate your skype with an HF account.

Are you able to do any configuring of wp plugins or scripts?

Or familiar with jacking scripts?

I'm also interested in a private crypter, with all the good stuff, native, but also able to crypt .NET, smallest output possible, autogenerating stub, etc. I don't need icon, persistence not any extras, just a FUD output. You have jabber? if you do, add me: fire_bender@exploit.im

Thanks!

Just purchased off this guy, he finished the project quicker than i expected. Fast, reliable , and constantly updating me on it.

Best \$50 ever spent.
