Thread: [Super-Ranking Video Deleted - Can't Get re-up Ranked \(nNo HD, Same file\)](#)

Effexion - September 12, 2016, 3:38 am

Twatting fucky fucker twats flagged my video and got it removed. It was making me a little bit of money too (finally).

I went to another account on another browser and re-uploaded it. Now it's not ranking (last was almost insta-rank) and the HD label isn't showing despite it being the same file.

Can anyone advise me a little.

Youtube knows this video has been deleted before, you could try to modify it and upload it again

Yeah even if you make it a second longer change the file name. If you reupload the same file name same size it won't post

SPECTRE - September 13, 2016, 1:33 am

It doesnt matter if its the same length, same name, same creation date. All that matters for youtube is an unique MD5 hash for the file, you can get md5 changers all around the internet
