Welcome to the Synergy demo review thread.

This is for legit CSGO players on HackForums to get help and allow them to get feedback on their gameplay.

It is only me at the moment reviewing demos, so I will get through as many as I can.

I am personally Global/SMFC with soloQ just depends on my win/loss, but I can be some help to many people.

Legit demos only, cheating demos will be ignored.

Post games where you do bad/ok so that I can see what you did wrong.

Please fill this form out and post below to have your demo reviewed (You may also PM me if you would like to remain private.)
