Thread: [DarkTrack Alien & Dark Comet](#)

Just4Fun100 - September 12, 2016, 7:12 pm

So I got DarkTrack Alien, I was able to create a server successfully but i can't seem to find the stubs no where??? Once I create the server It tells me everything is accepted and created successfully but i still can't find my stubs.... Does anyone know how?

And about Dark Comet, where can i find the official download???? I go to their own website and all they have is Dark Comet Remover? I was watching videos on youtube for dark comet and i noticed how the stubs appeared on your desktop once you create a server, why isn't it happening like that with DarkTrack Alien?

PTPM - September 12, 2016, 7:27 pm

For DarkTrack the stubs are in the DarkTrack folder. As for Dark Comet, idk.

Thanks I found the stub on the folders. But that stub was sitting there before I even created a server? Isn't it suppose to rename it self into what I named it when creating a server?
