Thread: [You want the best hacking program in the world?](#)

Risitas - September 12, 2016, 9:50 pm

pastebin.com/BEJ1r2is

just compile this shit , send it to your victim and its done :)
i will add a persistence shit on it and, a remote shell lol
to see the guy ddosed and with a remote shit.

Yassuo - September 12, 2016, 9:52 pm

Omg I just hacked fucking HF with it thx op

Risitas - September 12, 2016, 9:54 pm

add this shit into your doc exploit, but be carefull it must be FUD lol

o shit i must add a second webbrowser!
error in the shit code!

Code WebBrowser1.Navigate("0xad.net/cactus/") << fuck the computer
replace 1 with 2 and add a new webbrowser on the form..
it will be more powerfull and shitty

It's assembler bruh why don't you see?

Risitas - September 13, 2016, 2:43 am

i just need to some shit like metasploit bullshit for a remote shell and ddos in the same time + persistance process

BSM72910 - September 13, 2016, 2:49 am

el o el im gonna submit this for my c++ assignment due tmmwr, thanks dood !!
