I keep trying to edit my title/post, quick edit works. But i'm trying to edit my title of my thread and i get this.

Yes, I get the same error when trying to edit with the "full edit" option.

I use only the "quick edit" and to edit the title I just use the "hold left click over thread title" function.

Find your thread in the section view and click and hold the thread title.

For me quick edit doesn't work, say's the site is blocked on my college network (fortinet firewall).

Full edit works fine though. How that works totally eludes me.
