Thread: [After the arrest of AppleJ4ck,Poodlecorp is down.](#)

kmz22222 - September 13, 2016, 1:46 am

I know i'm supposed to be in a break from HF but when i found all these shits i had to make a thread about it.

=====

So incase if u don't know,Applej4ck recently got arrested.

Someone sent a tip to the FBI that leaded them to arrest AppleJ4ck.

According to multiple sources he lives in "israel"

Now i'm not making this thread to talk about applejack,i'm here to discuss the relationship between vDos Stresser and Poodlecorp.

After many websites claimed that AppleJ4ck got arrested including theverge:

<http://www.theverge.com/platform/amp/2016/9/11/12878692/vdos-israeli-teens-ddos-cyberattack-service-arrested?client=ms-android-sonymobile>

On september 11,Poodlecorp twitter had only 1 tweet:

[img]http://image.prntscr.com/image/b329b176cee54d81acdd41c0b0fcbbc0.png[/img]

Couple hours later Poodlecorp changed their official website into this:

[img]http://image.prntscr.com/image/57bcb8d82cb9490d96b408778638e097.png[/img]

Quote:The End

PoodleCorp has officialy came to an end.

Nobody has made us quit, but our own mind.

We thank everyone that have supported us.

Long Live Poodles #PoodleCorp #Summer2017

From this shit i can tell 2 things.

First of all,There is a reason why they quit. cough*FBI*cough

Second of all,The hashtag "#Summer2017" maybe poodlecorp gonna be back in 2017? who knows,personally i dunno but this just caught my attention.

Anyway,From all of this shit we will go straight for the conclusions.

=====

Conclusion:

Back then the member xoxo made an interview with keemstar,He said that the DDoS attacks are made from their botnet,This could refer to Lizard Squad's botnet since the leader was an official poodlecorp member OR this could refer to AppleJ4ck's botnet which is probably vDos and since vDos has come to an end,that means that 1 of Poodlecorp's main DDoS attack source is down.

Personally i think this is the main reason why they quit.

Also after the arrest of 1 of their official members,Maybe they got scared?

The FBI would have possibly go for the rest of their members too if they continue the chaos that they were making.

Also if AppleJ4ck was living in israel,That means most of the "dox of poodlecorp" shits out there were fake.

I have never seen a dox on poodlecorp that says that 1 of their members is in israel.

I have no idea who made the tip to the FBI that leads to the arrest of applejack,Could be 1 of poodlecorp's members,Who knows?

=====

Final shit:

I think i am going to miss the chaos that they were making,also i was kinda against it ?

If poodlecorp/lizardsquad ever decided to make another group OR make a comeback in summer 2017,Expect another 1 of their members to get arrested again.

=====

Please don't show any type of hate in the replies,Also don't pretend to be a smartass and say "TLDR" because i had to type all of these shit.

#GoodBye #Poodlecorp

EDIT: The purpose of this thread wasn't to give poodlecorp attention nor to discuss if we should call them skids or hackers.

The purpose of this thread was to show that poodlecorp has come to an end for a reason [while they were denying it].

2nd edit: Also this thread turned into a massive discussion so don't even blame me for it.

J?son - September 13, 2016, 1:49 am

AppleJ4ck was a member of poodlecorp also

kmz22222 - September 13, 2016, 1:54 am

(Sep 13, 2016 01:49 AM)Jas?n Wrote: [\[CITE\]](#) AppleJ4ck was a member of poodlecorp also
Yup,he was a member.

Here is an old picture from their website:

[img]<http://image.prntscr.com/image/e836d642e9b747548fd0a97ee6a2f655.png>[img]

J?son - September 13, 2016, 1:59 am

they exploited the poodlecorp stresser, the API used to power it was pointed @ api.vdos-s.com

Knucklez. - September 13, 2016, 2:01 am

I don't really keep up with these groups. Did they do anything speculator other than ddos random games?

kmz22222 - September 13, 2016, 2:05 am

(Sep 13, 2016 01:59 AM)Jas?n Wrote: [\[CITE\]](#) they exploited the poodlecorp stresser, the API used to power it was pointed @ api.vdos-s.com

Nice information you got there.

FYI: This wasn't the first time that poodlecorp stresser was hacked/exploited.

(Sep 13, 2016 02:01 AM)Knucklez. Wrote: [\[CITE\]](#) I don't really keep up with these groups. Did they do anything speculator other than ddos random games?

I only keep up with lizard squad since they had reasons for their attacks,And fuck no poodlecorp are just random guys that ddos popular websites and random games.

LordCoder - September 13, 2016, 2:08 am

Nice attwhores. When will they do anything interesting rather than just "DDoS" websites...

HairyHarry - September 13, 2016, 2:09 am

(Sep 13, 2016 02:01 AM)Knucklez. Wrote: [\[CITE\]](#) I don't really keep up with these groups. Did they do anything speculator other than ddos random games?They hacked a few large YouTube channels including Leafy, Watchmojo and Redmercy.

I don't remember all of them.

Prophett - September 13, 2016, 2:10 am

I had the same thought... Coincidence? I think not.

J?son - September 13, 2016, 2:11 am

i find that most booters get hacked through their ticket system

kmz22222 - September 13, 2016, 2:38 am

(Sep 13, 2016 02:08 AM)LordCoder Wrote: [\[CITE\]](#) Nice attwhores. When will they do anything interesting rather than just "DDoS" websites...
"attwhores"

That is the definition of poodlecorp.

(Sep 13, 2016 02:09 AM)HairyHarry Wrote: [\[CITE\]](#) They hacked a few large YouTube channels including Leafy, Watchmojo and Redmercy.

I don't remember all of them.

Oh,so taking accounts from Leaked DBs and using them consider "hacking"?

(Sep 13, 2016 02:10 AM)Medd Wrote: [\[CITE\]](#) I had the same thought... Coincidence? I think not.
Poodlecorp=Loominarty cunfirmed.

(Sep 13, 2016 02:11 AM)Jas?n Wrote: [\[CITE\]](#) i find that most booters get hacked through their ticket system

True.

HairyHarry - September 13, 2016, 2:54 am

(Sep 13, 2016 02:38 AM)kmz22222 Wrote: [\[CITE\]](#) Oh,so taking accounts from Leaked DBs and using them consider "hacking"?Have you ever tried logging into a Google account with 2FA?

Mongu - September 13, 2016, 3:09 am

(Sep 13, 2016 02:54 AM)HairyHarry Wrote: [\[CITE\]](#) Have you ever tried logging into a Google account with 2FA?

^^^ They used a bypass, so it did somewhat involve hacking.

kmz22222 - September 13, 2016, 3:15 am

(Sep 13, 2016 02:54 AM)HairyHarry Wrote: [\[CITE\]](#) Have you ever tried logging into a Google account with 2FA?

Have you ever tried to google how to bypass 2FA?

(Sep 13, 2016 03:09 AM)Mongu Wrote: [\[CITE\]](#) ^^^ They used a bypass, so it did somewhat involve hacking.

Exactly,but that's not really hacking in my opinion.

Account of the Gods - September 13, 2016, 3:23 am

lol so they downed league of legends? nice one, crap game matching me with latin cant get out of diamond

how many bots they had?

Mr. Robot - September 13, 2016, 3:37 am

(Sep 13, 2016 02:38 AM)kmz22222 Wrote: [\[CITE\]](#) Oh,so taking accounts from Leaked DBs and using them consider "hacking"?No they were sim jacking.

(Sep 13, 2016 03:15 AM)kmz22222 Wrote: [\[CITE\]](#) Have you ever tried to google how to bypass 2FA?

Exactly, but that's not really hacking in my opinion.
Yes and it is hacking.

HairyHarry - September 13, 2016, 3:39 am

(Sep 13, 2016 03:15 AM)kmz22222 Wrote: [\[CITE\]](#) Exactly, but that's not really hacking in my opinion. Hacking is not about opinions, it's about facts.

The definition of hacking is "use a computer to gain unauthorized access to data in a system."
By bypassing the 2FA you've used a computer to gain unauthorized access to a Google account.

Mr. Robot - September 13, 2016, 3:42 am

(Sep 13, 2016 03:39 AM)HairyHarry Wrote: [\[CITE\]](#) Hacking is not about opinions, it's about facts.

Too many people on this fucking forum assume hacking is something it isn't. They want it to be more than it is - It's absolutely ridiculous the amount of times I see people try and say oh that's not hacking, but guess what - as much as you want to dream that everything is 100% like the movies, reality is much simpler.

Sure there is a certain level of understanding, especially when it comes to hacking websites or coding - finding exploits and 0days but 9 times out of 10, the 0days are more or less simple once you know how and why they work and as soon as that happens - all the skids come out and say oh that's so easy, it's not hacking.

HairyHarry - September 13, 2016, 3:46 am

(Sep 13, 2016 03:42 AM)Mr. Robot Wrote: [\[CITE\]](#) Too many people on this fucking forum assume hacking is something it isn't. Are you telling me that it's not like in the movies?

<https://www.youtube.com/watch?v=Q1CzCQ4eT0g>

But yeah, hacking is literally as simple as you manage to make it.

Some hackers don't even have good computer knowledge, they just achieve access through social engineering. It's all about knowing what you're good at, and then abusing it.

sixdenk77 - September 13, 2016, 3:48 am

damn thats really hard :(

Account of the Gods - September 13, 2016, 3:49 am

hacking is hacking, even skids are hackers, just bad ones, i see no reason to argue over what is hacking and what is not

you realise theres no 100% pure hacker as everyone uses other people programs, exploits, rats, okay lets say u write ur own ones, still u write them in language someone else made, then u use browser someone else made on windows or linux someone else made on a computer you got from

pc shop

i wouldnt really care about it whether ur pure hacker or not, as longs as its about you and not me, cause the more u know the more u get, if your a skid u wont succeed probably, even if ur a hacker, if u know a lot u probably can use this knowledge to make money

Tommy Chong - September 13, 2016, 3:51 am

Poodlecorp is getting too much attention.
Why do we even give it to them?

kmz22222 - September 13, 2016, 3:51 am

(Sep 13, 2016 03:23 AM)hackingdom Wrote: [\[CITE\]](#) lol so they downed league of legends? nice one, crap game matching me with latin cant get out of diamond how many bots they had? LoL Noob cunfirmed.

(Sep 13, 2016 03:37 AM)Mr. Robot Wrote: [\[CITE\]](#) No they were sim jacking.

Yes and it is hacking.

Whatever...

Quick note: Unblock me on discord ffs mr.robert

Okay so basically you are saying that i am a skid because i said it's not hacking right?

Well it's really up to you guys if you think fucking with a sim card would make you be a hacker, idk guys it's really up to you.

Maybe when they used the sim jacking shit on H3H3 productions maybe u can call that shit hacking but when it comes to DDoSing [the main shit that they do all the time] would you call them hackers or skids?

We are not talking about the youtube part they only fucked with couple bunch of utubers then everything got fixed.

It's really up to you if you want to call some skids "hackers" just because they were able to fuck with sim cards and bypass 2FA.

Mr. Robot - September 13, 2016, 3:52 am

I'll give them one thing - everything in that clip is technically possible.

While it might not work "exactly" like that, if you know an exploit that happens to work + can hack into a website you know your way around or possibly already know the exploit - then your main goal in that scene is to hack in the current system you are on to unlock the door (run on the network) and turn of the power which if run on a setup through the network, is possible.

kmz22222 - September 13, 2016, 3:53 am

into a website you know your way around or possibly already know the exploit - then your main goal in that scene is to hack in the current system you are on to unlock the door (run on the network) and turn of the power which if run on a setup through the network, is possible. That's actually true.

But let's be realistic, in reality it most likely won't happend.

The last part is impossible though - he cut off the power, because no light on the computer screens, but he still manages to "fix" it.

Account of the Gods - September 13, 2016, 3:56 am

being honest these dictionary attacks connected with social engineering in mr robot season 1 were so impossible lol he guessed passwords most of the times while actually most people arent using words describing their jobs lives or whatever other than that- great serial

ThisIsCyn - September 13, 2016, 3:57 am

(Sep 13, 2016 02:09 AM)HairyHarry Wrote: [\[CITE\]](#) They hacked a few large YouTube channels including Leafy, Watchmojo and Redmercy.

I don't remember all of them.

They didn't really do much....

A few ways they could've/might've (saying that for my own security) this is hypothetical.

1. Fraud technique called sim swapping
2. Social engineering phone suppliers
3. Database lookup (for the first part to be able to gain access then you'll need to bypass 2fa)
4. Targeting members that use Google authenticator (there is a semi public exploit. It's public if you know where to find it)

There was someone I used to speak to that had access to vdos. He just disappeared I have 0 idea

Mr. Robot - September 13, 2016, 3:57 am

(Sep 13, 2016 03:51 AM)kmz22222 Wrote: [\[CITE\]](#) Okay so basically you are saying that i am a skid because i said it's not hacking right?

It's really up to you if you want to call some skids "hackers" just because they were able to fuck with sim cards and bypass 2FA.

While ddosing is simple enough - infecting clients again is simple - finding some bug in a site can be simple - finding/using database entries is simple - coding bruteforce/dictionary attacks is simple - creating configs for sentrymba is simple - sim jacking is simple - ewhoring is simple - social engineering is simple

All of these are done by 'hacker's besides maybe ewhoring but when it comes down to it - what you want is someone who creates hardware hacks such as rfid scanners, fake cards/copy cards for breaking into buildings and stealing info from the electronic strips.

It's something you need to reconsider especially if you want to give me any explanation of "Hacker" that doesn't include mentioning some guy who found the most discreet 0day known to man kind that's physically impossible to replicate.

While I would love to call them skids just for being complete and utter asshats - you have to understand that through the social engineering they did, even after getting their dox publicized and whatever else - the exploiting of the youtubers accounts (with 2fa and SE) defines them as Hackers.

Love it or hate it, you can call it whatever you want. I'm still going to call them skids because it makes me feel better about myself.

I know,I understand all of that shit.

But did they show any of their actual skills?

No,this is why i won't call them hackers.

(Sep 13, 2016 04:06 AM)Mr. Robot Wrote: [\[CITE\]](#) While I would love to call them skids just for being complete and utter asshats - you have to understand that through the social engineering they did, even after getting their dox publicized and whatever else - the exploiting of the youtubers accounts (with 2fa and SE) defines them as Hackers.

Love it or hate it, you can call it whatever you want. I'm still going to call them skids because it makes me feel better about myself.

Alright,ik they did some SE shits and u can call them hackers but since the purpose of all of this shit was "chaos for fun" then i don't really think i'll call them hackers.

Call them whatever you want,it's ok i won't argue anymore.

Same here,Calling them skids will probably make me feel better.

Mongu - September 13, 2016, 4:09 am

(Sep 13, 2016 04:01 AM)kmz22222 Wrote: [\[CITE\]](#) So now we are changing the topic to mr robot season 1? Cool.

Hacking is simple,But i don't even fucking know why would you call them hackers instead of skids..

Okay so first of all i am not trying to argue about any shit.

I'm not fucking starting drama or any type of shit but i don't see why we would call them hackers not

skids.

Second of all why the fuck would poodlecorp be my idols? i don't get it.

Why are they skids? They clearly knew some shit. They were classified as hackers, even if it was low level. A skid would be someone like you or me, someone or can't do jack shit. These guys atleast knew some stuff compared to a fair few. Just because they were attention seeking, doesn't make them skids.

Well to be honest, wrong again.

The issue would be the power source for the keyboard.

The monitor gets plugged into a power source/wall socket.

The server is located in another room - the monitor connects without wires to the server which all the other machines run off.

Maybe the keyboard/mouse run wireless/bluetooth too ?

It does make sense for each person in the room to be on their own machine however that may not be the case.

Press windows + R on your keyboard.

Now type
taskkill /f /im explorer.exe

Oh look there goes your taskbar and everything else.
Now press windows+R

Type
Explorer.exe

(if for some reason windows+r doesn't want to work after you taskkill explorer.exe, just press ctrl+Shift+esc and in task manager click file, new task then type explorer.exe)

Also when you deal with raspberry pis, you will very quickly learn to do shit without a monitor :D

He probably knew he was already in a terminal and just typed a script to bring it up or command.

./lighting.py

Actually most filters nowadays make use of mitigation device,
then when people use Source spoofing with botnets, you can use ingress filtering to stop that. The
reason why their botnet is effective as fuck is their size.

kmz22222 - September 13, 2016, 4:59 am

If you were such a godsend, what happened?

Also back to the whole pps thing,
I'm still wondering the formula for packet size when 'stressing'

You would do pps x 256 bytes right? to get bits(8), so do ppsx256x8 to get the total bits per second? Then just do bits to mbps to get the mbps ?

So at uhh 30mpps with a packet length of 1

$30,000,000 \times 1 \times 256 \times 8 / 8589934592 = 7.1\text{gbps}$

30mpps

1 packet length

256 bytes

8 bits

8589934592 gbs to bits

Packet length of 100

$30,000,000 \times 100 \times 256 \times 8 / 8589934592 = 715\text{gbps}$

I know what i am talking about,you are probably a poodlelover or something.My bad "they"....

Well here are some facts they didn't use databases.

If they had password from db when they try to login 2fa will stop them. Then it will ask them for code from phone. They social engineerd Tmobile etc. Got their SIM cards and then from that they can reset gmail accounts.

I can provide more proof.

AppleJ4ck logged also in today (Last Visit: Today 03:26 AM).

And he got arrested, thats pretty clear...

It could still be him, since he is only on house-arrest & i think nobody in Isreal is monitoring if he is touching a PC or something. It could also be a friend which used his login details for removing / editing some stuff for him.

Uhm for people who maybe still don't know.

PoodleCorp = 1/2 / some of the LizardSquad Members

Botnet used for PSN/XBOX DDoS attacks (hacked home routers) LizardSquad's own botnet
Botnet used by PoodleCorp / PoodleStresser & other members/stressers = vDos API

From some info sources, it's clear that
PoodleStresser was owned by Pein (antichrist)

Shenron was the original LizardSquad stresser from official members - (which used hacked home routers) botnet

LizardStresser.su was the fake lizardsquad stresser (was only announced on their twitter for money), which was run by Starfall & some arrested darkk*** members (Rory Guidry etc).

I just wanted to explain some things, because i did not read the entire thread & i was not sure, if some people still asking / searching for this info.

I did also wrote that AppleJ4ck's accounts recently logged in today & yesterday.

Do you think that they're going to be extradited to the U.S? I think if they stay in Isreal without extradition nothing will happen to them.

kmz22222 - September 15, 2016, 1:46 pm

I'll try and look for an internet archive [e.x. wayback machine]
I'll see if i can check what was apple j4ck OR the feds doing when he OR they logged in the account.

Also this shit:
[img]<http://image.prntscr.com/image/68c2405474a740f6946ba0f60f901935.png>[/img]

Clearly shows that applej4ck was in danger/something wrong happened.

I'll post results if i got any.

Look at his Trust Scan

"Number of Unique Login IP's (last 30 days): 1"

Also he got 2factor enabled, lol...

I don't think that the feds are behind these logins.

< 30 days he still posted things in the vDos stresser thread.

kmz22222 - September 15, 2016, 1:56 pm

k nobody gives a single shit about them.
And about the links,TLDR.
They were a huge part if not the MAIN reason of vDos owners arrests.
Here is BackConnect explaining what happened:

"*Events leading to the Hijack*: On 9/6/2016, ~10:30AM PST, one of our clients and our website received a large and relatively sophisticated DDoS attack. The attack targeted entire subnets and peaked over 200 Gbps and 40Mpps. Although the attack was automatically detected and mostly filtered, there was initially a small leak. In response we quickly applied new security rules that rendered it entirely ineffective. The attackers continued to attack our network and client for roughly 6 hours before giving up.

Events that caused us to perform the BGP hijack: After the DDoS attacks subsided, the attackers started to harass us by calling in using spoofed

phone numbers. Curious to what this was all about, we fielded various calls which allowed us to ascertain who was behind the attacks by correlating e-mails with the information they provided over the phone. Throughout the day and late into the night, these calls and threats continued to increase in number. Throughout these calls we noticed an increasing trend of them bringing up personal information of myself and employees. At this point I personally filled a police report in preparation to a possible SWATing attempt. As they continued to harass our company, more and more red flags indicated that I would soon be targeted. This was the point where I decided I needed to go on the offensive to protect myself, my partner, visiting family, and my employees. The actions proved to be extremely effective, as all forms of harassment and threats from the attackers immediately stopped. In addition to our main objective, we were able to collect intelligence on the actors behind the bot net as well as identify the attack servers used by the booter service."

Yeah i read that shit.

Probably said that to make people be more comfortable with his b00t3r.

Ascenseir - September 16, 2016, 6:40 am

Apparently BackConnect is planning to report all vDos customers from the last 4months. lol.

"Customers

vDOS provided a service, but who were their customers?

Townsend said BackConnect is looking over the data to help identify and report the criminals who paid for malicious attacks.

"We expect anyone that used vDOS services in the last four months to go into hiding in fear of also being caught by authorities," he said."

[img]<http://image.prntscr.com/image/6bca5d879344431fac25c6d17818c18a.png>[/img]

As you can see in the picture vDos had ALOT of traffic about 400k [almost half a million] so i guess they also have alot of customers.

Best of luck reporting hundreds of thousands of vdos customers.

I'm writing an update post to cover all the latest news that went down on this applej4ck situation n shit.

Global Elite - September 16, 2016, 8:58 am

Damn... Scarce isn't going to have much to report on besides Minecraft Pedo's if PoodleCorp is down.

King of Diamonds - September 16, 2016, 9:26 am

Damn, RIP Apple J4ck. He seemed like a really nice guy, although I don't know him very well.

kmz22222 - September 16, 2016, 9:26 am

(Sep 16, 2016 08:58 AM)Global Elite Wrote: [\[CITE\]](#) Damn... Scarce isn't going to have much to report on besides Minecraft Pedo's if PoodleCorp is down.

You are about to witness Scarce v2.0

Hey what's up guys it's scarce here and today there is so much news that went down here. I might have to double upload but anyway onto the first news we got AppleJ4ck Last visit date.
[img]<http://image.prntscr.com/image/cfadf382aa864c42a79adcb81e2fea4b.png>[img]

It looks like someone logged in applejack's account yesterday..... cough FBI cough feds cough cough

So anyway that shit was weird probably dem fedz.

Also if you looked at the replies there is this shitconnect or BackConnect they wanted to fucking report every vDos customers

Archersec made an article type of shit about them that you can read about it here:
archersecuritygroup.com/cyber-battle-rages-internet-arrest-cyber-crime-suspects/

There is another owner of vDos his name is m30w and he is a member here on HF and as you can see here is his last visit:

[img]<http://image.prntscr.com/image/8bba6172693d457c89b7c5f022c7ec82.png>[img]

So yeah guys make sure to PM m30w saying R.I.P or Fuck the police since the feds will be accessing his account soon.

and that's it for today's video guys andifyouenjoyitleaveathumbsupandi'llculater..... peace.

kmz22222 - September 16, 2016, 9:27 am

(Sep 16, 2016 09:26 AM)King of Diamonds Wrote: [\[CITE\]](#) Damn, RIP Apple J4ck. He seemed like a really nice guy, although I don't know him very well.

RIP Applej4ck ????

He was 2hotandnice4me tbh

NGINXFLEXER - September 16, 2016, 10:18 am

It does not make any sense, why should the feds be logging into AppleJ4ck's account but not into M30w's?

Also AppleJ4ck posted 2 days before he was arrested that vDos was not hacked. His TrustScan

shows that he has 2factor enabled & his ip-address did not change in the last 30 days.

Since he is on house-arrest, he could easily get one of his parents/brothers/sisters to login into his account & do some stuff.

I can't proof it, but im 100% sure that he is the guy who is just viewing all the aftermath on HF.

For what reason should the feds login tho? For reading his PM's? And why the hell should they login at 3AM? I think it's a good time for a guy on house-arrest to not be monitored at this time in the night.

Also the "AppleJ4ckxoxo" account on twitter is from some troll i think, because after some PoodleCorp stuff the twitter handle "AppleJ4ckxoxo" which was former the original AppleJ4ck disappeared for some weeks & now some days before/after his arrest it magically appeared again.

Sadly the account "AppleJ4ck_vDos" on twitter is obviously one of his old real accounts which made fun of the FBI & now got fucked by them.

I tryd to contact some of his family over facebook, but they never replyd to me. His facebook is not public active since 2014.

I just wanna know if it's really him logging into HF the last 48 hours.

R.I.P AppleJ4ck he was a nice & funny guy, but he truly did some unnecessary & retarded things which provoked an arrest.

t0rch - September 16, 2016, 10:21 am

I think it's just now that they're back in school they're busy dealing with homework and don't have time to login to their DDoS cPanel's. They came back at the start of the summer. School has just started back for people in Canada. And the dude ch3wt0y lives in Ontario. The fucking idiot was live streaming not only included his face in one but also included license plates of parked vehicles on a street.

Ascenseir - September 16, 2016, 10:26 am

I just found an interview of P1st/m3ow (1 of vDos owners who got arrested) In an israeli news site called mako posted 3days ago:

www.mako.co.il/news-channel2/Channel-2-Newscast-q3_2016/Article-1056c06609f1751004.htm?partner=mobileAutomaticChannel (put a dot instead of the spaces)

The guy talking at 0:14 in the video is him. Sadly it's in hebrew so I'll try to give a tl:dr

Basically he says that there is no reason to arrest them, because there are no victims caused by what they did, and there were no complaints at all by anyone (which is obviously a lie, they knew what they were doing)

He also says that the only thing he worries about is how this is gonna affect his future in joining the 8200 (an Israeli Intelligence Corps unit responsible for collecting signal intelligence (SIGINT) and code decryption. It also appears in military publications as the Central Collection Unit of the Intelligence Corps and is sometimes referred to as Israeli SIGINT National Unit (ISNU).) after they accepted him and were impressed by his abilities.

Look at this interview, and now think about how easily AppleJ4ck could just login into his account / let some other guy login into it.

Which fed goes on a HF account at 3-4 AM in the morning which got 2factor enabled & shows the same ip in the last 30 days?

I mean i got arrested in germany one time because of a reallife guy & after release i immediately told a friend to login & shutdown important servers for security reasons / worrying about.

kmz22222 - September 16, 2016, 10:35 am

hak/

verb

gerund or present participle: hacking

1.

cut with rough or heavy blows.

"hack off the dead branches"

synonyms: cut, chop, hew, lop, saw; slash

"Stuart hacked the padlock off"

2.

use a computer to gain unauthorized access to data in a system.

"they hacked into a bank's computer"

gain unauthorized access to (data in a computer).

"hacking private information from computers"

Social Engineering can give unauthorized access to data. Calling it hacking wouldn't be the most inaccurate thing to say.

edinbror - September 18, 2016, 11:17 am

<https://hackforums.net/showthread.php?tid=5404221>

Poodlecorp end tweet was on sep 11:

[img]<http://image.prntscr.com/image/b329b176cee54d81acdd41c0b0fcbbc0.png>[/img]

Also on Sep 11 [The day poodlecorp said they "officially came to an end]

"Phantom Squad" Tweeted out this:

[img]<http://image.prntscr.com/image/668a0ce492704bc08119f0c9b36b8dea.png>[/img]

Followed by those tweets on Sep 11 and 12:

[img]<http://image.prntscr.com/image/a2af68aca9cd4a9b95d7381e243b9131.png>[/img]

Are there any possibilities that phantom squad was the result of poodlecorp's end? if so then why the fuck poodlecorp is back? Do they want their enemies to fuck them up again?

Who fucking knows....

This shit is mysterious as fuck,there is something that we don't know here. [Possibly poodlecorp was hacked]

Also i was looking at phantom squad and found out this creepy tweet:

[img]<http://image.prntscr.com/image/7e5b47bff08a4776880d39c4524c2227.png>[/img]

What could possibly happen?

Basically the only guy left behind the LS twitter is UchihaLS a.k.a Brad Van Rooy, his info is public and im not sure why he is not arrested. He lives in the Netherlands, but i think that just the feds don't care about him because zeekill got arrested for the christmas ddos attack. I have multiple times seen screens from uchihas desktop with the client.c & server.c botnet files from lizardsquad.

I also watched some blab calls with Julius / Zeekill & Komodo few months ago.

But yeah, that all is public info & nothing new.

About 30 people watched that blab calls in the past. Always Komodo, Julius & Alex_King were there.

Also here is a proof (still its public info, but maybe some people will not belive it)

I don't know much about the other guys, i think there is Pein who runs PoodleCorp / LS and shit.

And since u confirmed it,i guess we already got it.

M30w [uid=1694616] Got involved into this drama shit bec. he was 1 of the owner of vdos [or something like that] anyway he also live in israel,i think he is a close friend to applej4ck.

I believe the FBI is already investigating the poodlecorp case,bet they have couple agents already working on it,if they catched more than 1 they will catch the others,GL PoodleCorp.

I could have already send them a tip but fuck that i dun fvck with the FBI and i don't want to get involved into shit.

<http://#.com/2016/09/#-hit-with-record-ddos/>

Applej4ck,Poodlecorp,LizardSquad,vDos... all those shits combined is just a big nightmare,their fucking botnet is no joke.

Personally i already think the U.S. military has already taken control of it since applej4ck got fvcked by the FBI.

Btw poodlecorp changed their website,they removed "the end" message that they had on their website,also members are using XMPP protocol which is fucking protected so i guess gl for the fbi searching for emails.

Noone knows what is going to happen next.

NGINXFLEXER - September 23, 2016, 3:07 pm

I talked to Stack on discord, he is not a member of PoodleCorp & he does not support them in any way.

?etasploit - September 23, 2016, 3:18 pm

Anyone know what krebs has to do with this? Shortly after he released an article about it someone smacked him with 600gbps+ and Akamai dropped him from their CDN. LOL

kmz22222 - September 23, 2016, 3:20 pm

PoodleCorp AKA. LizardSquad was indeed involved into this.

Confirmed by @BannedOffline:

Confirmed by Janomine:

(Sep 23, 2016 03:37 PM)Janomine Wrote: [\[CITE\]](#) Also

It's a botnet with hacked cameras, that sounds like LizardSquad-methods...

My opinion:

(Sep 23, 2016 03:32 PM)kmz22222 Wrote: [\[CITE\]](#) On Sep. 20 Krebs made an article about vDos with the title: "DDoS Mitigation Firm Has History of Hijacks"

You can still view it here: <http://web.archive.org/web/20160922124922/http://#.com/>

So i guess just because applej4ck was a member of poodlecorp,they all got mad and started calling other people to help with the DDoS.

According to Arstechnica,
source:

<http://arstechnica.com/security/2016/09/why-the-silencing-of-#-opens-a-troubling-chapter-for-the-net/>

So yeah i guess this shit was the main reason behind the attack.

Also,PoodleCorp tweeted about krebs from couple days and i think they were hinting that they were taking down his website.

I couldn't find the tweets nor an archive of it.

They probably deleted it yesterday or today.

But anyway they were involved.

tits4sale45 - September 23, 2016, 7:46 pm
